### Strain selection from different sources:

- Grown on Nutrient agar plates – Serial dilution
- After 24 hours of incubation at 37°C, single colonies of different sizes were picked
- Single colonies with different morphological characteristics such as size, shape, color, elevation and margin were identified.
- Selected single colonies will be purified by repeated Streaking and transferred to activity based nutrient agar plates.

### Laundry Detergents

Laundry detergent or washing powder is a type of cleaning agent used for cleaning.

Laundry detergent is manufactured in powder and liquid form.

While powdered and liquid detergents hold roughly equal share of the worldwide laundry detergent market in terms of value, powdered detergents are sold twice as much compared to liquids in terms of volume.

While liquid detergent is widely used in many western countries, powdered detergent is popular in Africa, India, China, Latin America, and other

Department of Commerce  
Womens Forum  
Guest Lecture on Gender Ethics

The image shows a screenshot of a PowerPoint presentation slide. The slide is titled "Gender Equality" and "Goal 5 Gender Equality -UNDP". It features a graphic of a woman and a man with an equals sign between them. Below this, it asks "Sex Ratio, Education, Employment...& Empowerment ???". There are two illustrations: one showing a mother with children before, during, and after a lockdown, and another showing a woman on a running track. The text "A mother is never off duty" is written below the first illustration. The slide is displayed in a PowerPoint window with a red title bar and a white background. The window title is "11102020182020 - PowerPoint Product Activation Failed". The slide number is 5. The status bar at the bottom shows "Click to add notes".
