The screenshot shows a mobile application interface for a guest lecture. At the top, the status bar displays the time 9:25, signal strength, and battery level at 85%. The app header shows a back arrow, the ID 'wqn-awjm-zqz', a red 'REC' button, and icons for refresh and volume. The main content area features a video player showing a presentation slide titled 'Small Samples : Problem 1'. The slide text reads: 'The mean nicotine content of a brand of cigarette is 20.0mg. A new process is proposed to lower the nicotine content without affecting the flavor. To test the new process, 16 cigarettes are selected at random from the week's output from the test plant. The sample mean nicotine content is found to be 18.5 mg. If the S.D. of nicotine contents is calculated to be 3 mgs, is the claim of the new process justified? Use 5% level of significance.' Below the video, the name 'DILIP D' is displayed. At the bottom, there is a row of participant avatars labeled 'You', 'DILIP', 'Devi', and '12 others'. Below this row are icons for a call, mute, video toggle, and a menu. The bottom of the screen shows the standard Android navigation bar with home, back, and recent apps buttons.

Invitation Letter

Name: Senthil Nathan N

Date: Wednesday, August 10, 2022

Dear **Senthil Nathan N**,

We are glad to inform you that you are being invited to undergo a short-term fixed traineeship under the **Applicant Training Program (ATP)** in our organization.

This training program would be in two stages. Stage 1 will be a **classroom training (CRT) of 2 weeks**. Stage 2, will be an **On-the-Job Training (OJT) of 4 weeks**. Furthermore, only on successful clearing the assessments and minimum requirements of the **CRT stage**, you will be moved to the **OJT stage**.

Please note that this invitation does not guarantee you permanent employment at BYJU'S. This Agreement will automatically expire upon the completion of the term of the training program, unless terminated earlier as per the provisions of Clause 13 of this Agreement. However, this period can be cut short or extended based on the individual's performance and at the discretion of the management. For example, if you do not clear the CRT (classroom training stage) based on assessments that you go through, your traineeship will be terminated after two weeks and you will be paid a prorated amount for those two weeks. The decision of the Company in this matter shall be final.

KARUNESH KUMAR S

Name

During the Cisco Networking Academy® self-paced course, the student has studied the following Skills:

- the universal concepts of computer programming (i.e. variables, flow control, data structures, algorithms, conditional execution, loops, functions, etc.)
- developer tools and the runtime environment;
- the syntax and semantics of the Python language;
- the fundamentals of object-oriented programming and the way they are adopted in Python;
- the means by which to resolve typical implementation problems;
- the writing of Python programs using standard language infrastructure;
- fundamental programming techniques, best practices, customs and vocabulary, including the most common library function in Python 3.

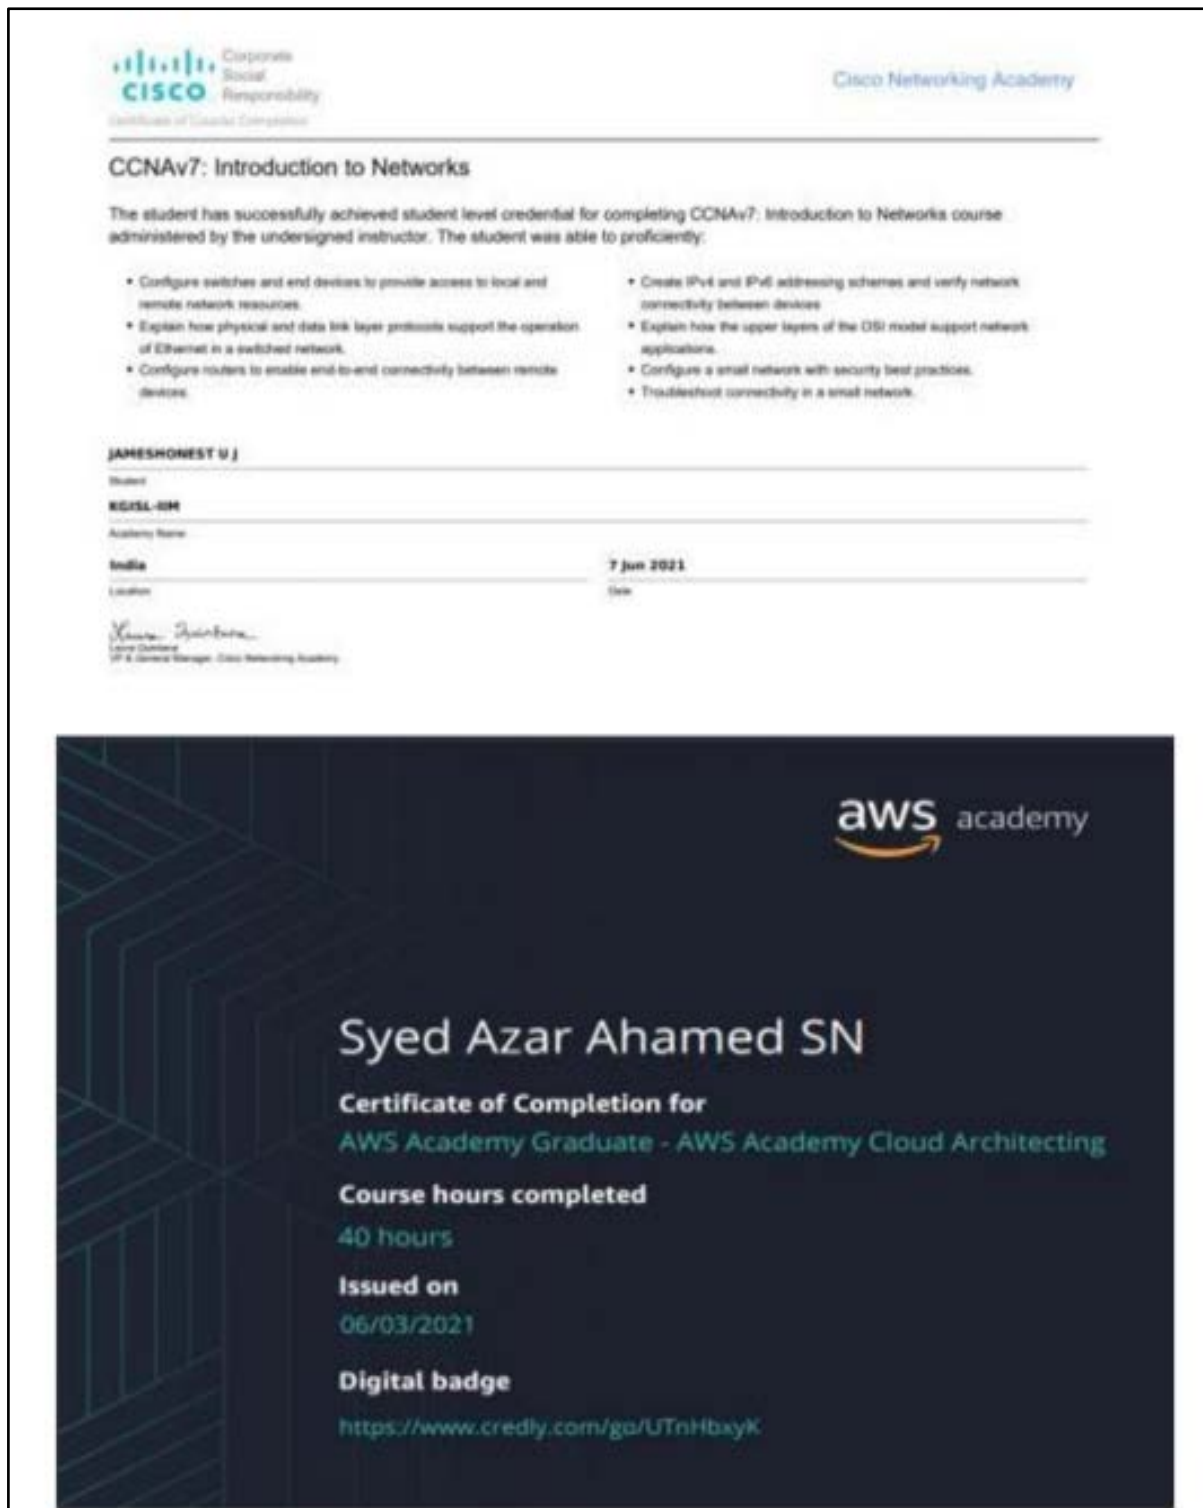

Maciej Wichary
VP, OpenEDG Python Institute

6 May 2021

Date

By completing the course, the student is now ready to attempt the qualification PCAP-Certified Associate in Python Programming certification, from the OpenEDG Python Institute.

Enhancement Topics: Data Structures

Course	BSc CS, IT, CT, SS, CSA, MM & B.C.A (Regular)
Effective from	2020-2021 and Onwards
Semester	III
Subject	CORE 4: DATA STRUCTURES

UNIT I Introduction: Introduction of Algorithms, Analysing Algorithms. Arrays: Sparse Matrices - Representation of Arrays. Stacks and Queues. Fundamentals - Evaluation of Expression Infix to Postfix Conversion - Multiple Stacks and Queues.

Enhancement: Asymptotic Analysis, Data Structure Pointer.

UNIT II Linked List: Singly Linked List - Linked Stacks and Queues - Polynomial Addition - More on Linked Lists - Sparse Matrices - Doubly Linked List and Dynamic - Storage Management - Garbage Collection and Compaction.

Enhancement: Circular Linked List, Circular Doubly Linked List.

UNIT III Trees: Basic Terminology - Binary Trees - Binary Tree Representations - Binary Trees - Traversal - More on Binary Trees - Threaded Binary Trees - Binary Tree Representation of Trees - Counting Binary Trees. Graphs: Terminology and Representations - Traversals, Connected Components and Spanning Trees, Shortest

Paths and Transitive Closure.

Enhancement: B Tree, AVL Tree.

UNIT IV External Sorting: Storage Devices - Sorting with Disks: K-Way Merging - Sorting with Tapes Symbol Tables: Static Tree Tables - Dynamic Tree Tables - Hash Tables: Hashing Functions - Overflow Handling.

Enhancement: Bubble Sorting, counting sort.

UNIT V Internal Sorting: Insertion Sort - Quick Sort - 2 Way Merge Sort - Heap Sort - Shell Sort - Sorting on Several Keys. Files: Files, Queries and Sequential organizations - Index Techniques - File Organizations.

Enhancement: Radix Sort, Selection Sort.

Effective from	2016-2017 and Onwards
Semester	II
Subject	CORE 3: C++ PROGRAMMING

UNIT I: Introduction to C++ - key concepts of Object-Oriented Programming - Advantages - Object Oriented Languages - I/O in C++ - C++ Declarations. Control Structures: - Decision Making and Statements: If .. else jump, goto, break, continue, Switch case statements - Loops in C++: for, while, do - functions in C++ - inline functions - Function Overloading.

Enhancement: Infinite Loops, Default Arguments, Ambiguity in function Overloading.

Presentation Topics: Object Oriented Programming, Decision Making and Statements.

UNIT II: Classes and Objects: Declaring Objects - Defining Member Functions - Static Member variables and functions - array of objects - friend functions - Overloading member functions - Bit fields and classes - Constructor and destructor with static members.

Enhancement: Operation on arrays, Abstract data types, string related library functions.

Presentation Topics: Constructor and destructor, Defining Member Functions.

UNIT III: Operator Overloading: Overloading unary, binary operators - Overloading Friend functions - type conversion - Inheritance: Types of

Inheritance - Single, Multilevel, Multiple, Hierarchical, Hybrid, Multi path inheritance - Virtual base Classes - Abstract Classes.

Enhancement: Evaluation of expressions, Pure virtual functions, Overloading some special operators like [], (), & and comma operator.

Presentation Topics: Operator Overloading, Inheritance.

UNIT IV: Pointers - Declaration - Pointer to Class, Object - this pointer - Pointers to derived classes and Base classes - Arrays - Characteristics - array of classes - Memory models - new and delete operators - dynamic object - Binding, Polymorphism and Virtual Functions.

Enhancement: Array based I/O, Dynamic memory Allocation, Ordered list

Presentation Topics: Polymorphism, Pointers.

UNIT V: Files - File stream classes - file modes - Sequential Read / Write operations - Binary and ASCII Files - Random Access Operation - Templates - Exception Handling - String - Declaring and Initializing string objects - String Attributes - Miscellaneous functions.

Enhancement: Power of templates, Standard Template Library (STL).

Presentation Topics: Exception Handling, Files.
