Policy for Environment and Energy Usage

The Environment and Energy usage Policy is to manage energy in such a systematic way so as to minimize its impact on the environment. The policy implies to explore the renewable energy resources to reduce the burden of the government and to find out substitute natural resources as solutions to the energy crisis. This environment and energy policy is binding for all the components of the institution and applies to all its stakeholders and to the various activities undertaken by the institution. It helps to embed efficiency and environmental awareness into everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage.

The Enviro Club, an official platform devoted to the cause of environmental awareness, to undertake green initiatives, and to conduct green literacy programmes to save energy and to protect the environment.

Composition of Enviro Club:

Principal as Chairperson, senior faculty as secretary, few faculty members, student representative, non-teaching staff.

Major Green Campus Initiatives.

- Harnessing renewable energy sources
- Assessing energy usage and measure its impact on the environment.
- Reducing local air pollution emissions using, public transportation and use of pedestrian-friendly roads.
- Installing LED bulbs in the complete campus to save energy.
- Developing systematic waste management mechanism.
- Installing rain water harvesting units.
- Undertaking tree plantation drive.
- Continuously improving our energy consumption.
- Ensuring the availability of necessary resources to achieve efficiency in energy use
- Providing training opportunities on energy saving measures.

This policy is communicated to the students and employees via internal communication channels, and made available to all the stakeholders on the institutional website.
