21/10/2021 - Outreach Programme -Distribution of covid precautionary kits

Academic Year 2020 - 2021

Activity	Provided Oxygen Buses for COVID affected patients
Date of the event	17/05/2021 – 27/05/2021 (10 Days)
Location	Government Hospital, Coimbatore
Context	COVID-19 has put huge pressure on health systems, with hospitals running out of oxygen, resulting in preventable deaths and families of hospitalised patients paying a premium for scarce oxygen supplies. Oxygen is an essential medicine, and despite being vital for the effective treatment of hospitalised COVID-19 patients, its access is limited due to cost, infrastructure and logistical barriers. Health facilities often cannot access the oxygen they require, resulting in the unnecessary loss of lives. Recognising the central importance of sustainable oxygen supply the management of KG College of Arts Science decided the launch of Oxygen Fitted Buses with Emergency Taskforce to rescue the COVID-19 affected patients at the time of medical emergency.
Objective	 To supplement government initiative at the time of medical emergency to prevent unnecessary loss of life by creating access to oxygen supply. To dedicate two buses for the public use at free of cost. To fabricate the vehicle to fit oxygen cylinders and employ trained taskforce. To give priority to aged people whose oxygen saturation is below 90.
Process	Two buses with oxygen support seats were fabricated and stationed at Coimbatore Medical College Hospital (CMCH) on 17/05/2021. The oxygen was provided by Lifeline Seva Gas. It is intended to ease the struggle of covid-19 patients who come to hospital for admission. The buses have oxygen line provided to seats, 12 each to accommodate patients who require oxygen support during the waiting period for hospitalization. The duct can be adjusted to provide two to five litres of oxygen per minute. Eight trained nurses were deputed to handle the patients who would seek support of medical professionals at CMCH during the shifting to the ward. The Dean of Medical College and the Revenue Officer inspected the oxygen buses before the launch. The cost of maintenance was Rs.five lakh per bus per month.
Outcome	Nine patients used the facility within half – an-hour of inauguration on 17/05/2020. More elderly persons whose oxygen saturation is below 90 were given first priority resulting nearly 50 preventable deaths. Benefitted the families of hospitalized patients paying a premium for scarce oxygen supplies. When the patients were not able to get admission for want of vacant beds, the mobile facility with oxygen either could search for alternate hospital or could hold the breath of the patients, by way of oxygen support till they manage to get admission.
