 10. What is the difference between youngsters in olden days and modern days?
 11. What is Missing From the Current youngsters?
 12. What advice would you give to the youth the period?
 13. What do you remember as youngsters?
 14. What is the difference between youngsters in olden days and Modern days?
 15. What is Missing From the Current youngsters?

AIM :-

Aim of this project is to depict the life of youngsters and the challenges faced by them at each part of their life. The young generation simply needs to renew, refresh and maintain the current status of society. When the youth contributes his ideas and energy to resolve social issues, he becomes a capable leader and can also make a difference in the lives of others.

“The youth of a country determine the future of a nation”.

What do you remember as youngsters ?

It remembers Vivekananda.

What is the difference between the youngsters of olden days and Modern youngsters ?

the youth of that period had speed and prudent and the young people of this age have speed and lack of prudent.

What is missing from Modern youngsters ?

they don't interact with relatives like friends and the experience is a bit lackluster.

What advice would you give to the youth of this period ?

this period of youngsters are in studious and knowledge for example.

they are knowledgeable with mobile.

we know one familiar story. that

the frog of the well asking a question to the sea frog that " tell me the size of your sea ? "

" Is your sea is as big as well ?"
Then the well frog visit to the ocean the frog of the well , upon seeing the great body of the water bowed at feet of the sea frog and exclaimed . It is only by comparing our home in the well that now we understand the littleness of our own homestead .

that is they would be better off listening to the experiences of their parents and relatives without thinking that only they know everything.

By S. Kothai [Music teacher]

Mrs. R. Jeeja [Assistant Professor in KGCAS]

S.P. Subramaniam [Kotak Mahendra Group
VIP co-ordinator]

Mr. Kanagaraj [Auto Mobile Service Man]

What do you remember as youngsters?

We were enjoyed a lot like under the trees almost like that we enjoyed going other places along with the friends these things reminds me that youngsters.

What is the difference between the youngsters in older days and modern youngsters?

They were using only a cashets and totally they are going through. I think they have to come over it and they have to start to speak with Peoples.

What is missing from the current youngsters?

The reading habit and every thing in their mobile and then what they think very difficult to write it out.

What advice would you give to the youth of this period?

No Nothing in particular but they have to reduce using these social media rights now and start communicate with people only then they know where they are in communications that's all I feel it.

What do you remember as youngsters?

In cinema field I remember Vijay and - political field Annamalai, VJP.

What is the difference between youngsters in olden days and modern days?

We had give respects on parents during our generation and we were discipline they give priority to their choices and not giving importance to their parents because of culture changes and turn to the foreign culture. cinema field, Indian culture

and all has damaged.

What is missing from the current youngsters they miss sports, extra curricular activity, reading writing, they are not concentrate with sports Books, reading writing extra curricular activities and they do not mingle with their family and spend time with friends. Having foods outside it will not be nutritious they should reduce that habit. Have their food at home as much as possible.

What advice would you give to the youth of this period?

Interact with parents, relatives villages and concentrate with Agriculture reduce watching tv and mobile start reading books like Mahabharattam and Ramayanam.

What do you remember as youngsters ?

youngster's they are enjoying their life with some responsibilities. We can see humanity and braveness in youngster's for example if any faced by the society, they stands first, they come forward and they help others.

What is difference between youngster's in olden days and modern youngster's ?

In olden days the youngster's are affraid to come forward for the problem even though they are motivated. But now a days the youngster's they come forward for all the problem's

What is missing from the current youngster's ?

In olden days the youngster's has motivation but they don't face it bravely

OUTCOME :-

It is said that in this New era youngsters are more stronger and influence than the olden days people. In my point of view it is said that this is happening because of they are educated. They want to get everything straight forward.

HADATHORAI TEA FACTORY

TEA LEAVES:

* Withering is the process of allowing the fresh leaves to dry. Some producers have special withering rooms, whereas others wither their tea in the open air.

* Rolling twists and breaks the leaves to release the natural juices. This action activates enzymes that help to initiate fermentation. Rolling also gives the leaves a curled appearance.

* Crushing (or cutting) is an alternative to rolling. It serves the same purpose, but finely chops the leaves instead of breaking them into large pieces. Cutting enables tea to brew quickly and produce a dark infusion.

* Fermentation is the process of oxidizing green tea leaves to make black and oolong teas. The green leaves are spread out and exposed to the air for three to four hours.

Drying :-

The primary objective of drying is the extraction of moisture and the arresting of fermentation. It takes about 20 to 25 minutes. The moisture content of the teas drying completed is approximately 2% to 3% and the fermented tea particles are now back.

Grading (sifting) :

The dried teas after cooling are graded / sifted according to size and shape as the trade demands.

Packing / Despatching :-

* Tea is very hygroscopic and rapidly absorbs moisture. When sufficient quantities of tea are collected, they are either packed in plywood tea chests or multi-walled aluminium craft paper despatched as the actions or packed into tea packs of various forms for direct export / distribution.

* An alternative to drinking tea is to double brew the leaves. Discard the first batch of tea and pour fresh boiling water over the re-used leaves; brew for the prescribed time.

Title : Experiential Learning

Objective : Improved student engagement

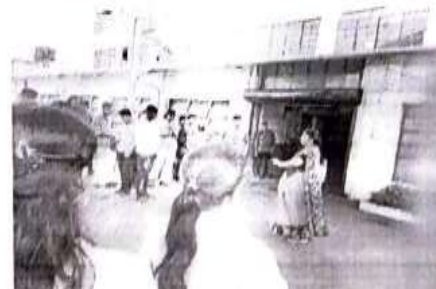

Process : The crux of this program was to enhance the process of learning through an active role which might help students feel more satisfied with their studies. They tend to turn more creative and innovative.

Outcome : Improved Student engagement
 Better academic performance
 Identifying and refining the learning process

Title : Experiential and Observational learning by organising Industrial Visit

Objective :

- To make the students understand Organisational Behaviour concepts by organising industrial visit.
- To maximise student engagement in learning.

Process : The students were asked to plan and organise a trip to Tea factory in Ooty and asked to learn the organisational behaviour concepts through this activity.

Organisational Behaviour is a field of study concerned with understanding, predicting and influencing human behaviour in organisational settings. The scope of Organisational behaviour includes:

- Human relations
- How they socialize with peers.
- Individual differences
- Human Engineering
- It is the man machine relationship.

LEADERSHIP:

There are various leadership styles they are Transformational, Transactional, Democratic, Bureaucratic, Authoritarian, Laissez-faire. In the industry they followed a free style leadership. The leadership style followed by the organisers was Laissez-faire, we enjoyed participating in all the discussions right from planning the visit, getting permission from department faculty members, Finalising the bus, planning for breakfast and lunch and coordinating with friends.

CONFLICTS WE WERE FACING WHILE THE INDUSTRIAL VISIT :

While we were about to visit the factory we was restricted to go by big bus and were asked to go by small mini busses and after few minutes of group discussion we decided to go by small mini busses and we went by small bus.

MOTIVATION:

Before we could plan for this trip most of them were not interested to visit due to some issues of their health. Then we the co-ordinators motivated everyone to join this trip so that everyone will be helpful by having this factory visit.

On receiving the letter of permission from BENCHMARK TEA AND CHOCOLATE FACTORY, OOTY, 36 students with 1 faculty went on an industrial visit to the factory on 06/05/2022. We assembled in college at morning 5:30 am and left the college in a bus. We reached the factory at 1'o clock. A well trainer gave us the processes of TEA making. He explained the various process of TEA making . Then when we were moving by we saw the machines were continuously working and it was doing all the processes perfectly.

Before we entered the TEA factory we visited the CHOCOLATE DEPARTMENT, when we were going around we saw the workers were doing the work concentrated. Everyone was wearing hand gloves and doing the work in a hygiene manner. While coming around we saw raw materials like there was few choco beans and then the chocolate was being melted and it was given a well mix without lumps.

After a well mix they added nuts and they added the mixture and they poured the chocolate in the different shaped moulds and they were kept in refrigerator to make it a good lined chocolates.

After the chocolate factory visit we moved ok to the TEA DEPARTMENT, then when we was moving there was TEA leaves for us to just check. We were seeing the process and the process was told by a perfect trainer.

PROCESS OF TEA MAKING:

There were two TEA processes one is

- * Green tea processing
- *Black tea processing

PROCESS OF GREEN TEA PROCESSING:

1. Steaming
2. Cooling/ Withering
3. First rolling
4. Drying (1st Firing)
5. Sorting/ Roll Breaking
6. Ball tea drier
7. Drying (2nd Firing)
8. Second rolling
9. Bulk Drying

10. Grading

PROCESS OF BLACK TEA PROCESSING:

1. Withering
2. Rolling
3. Fermentation
4. Drying and Grading

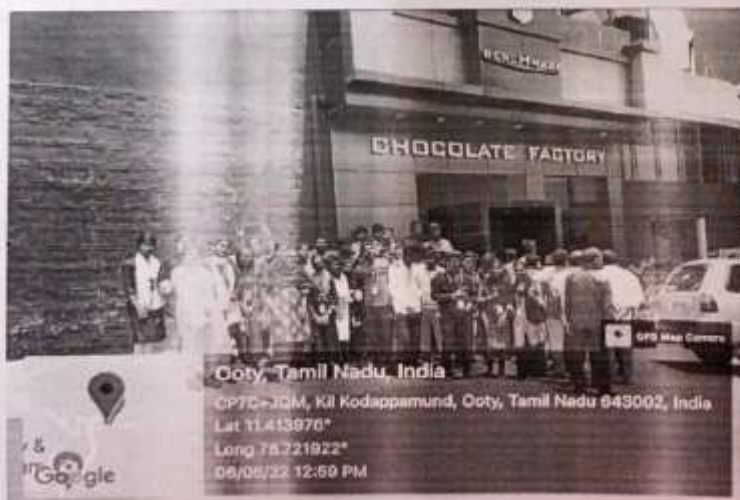

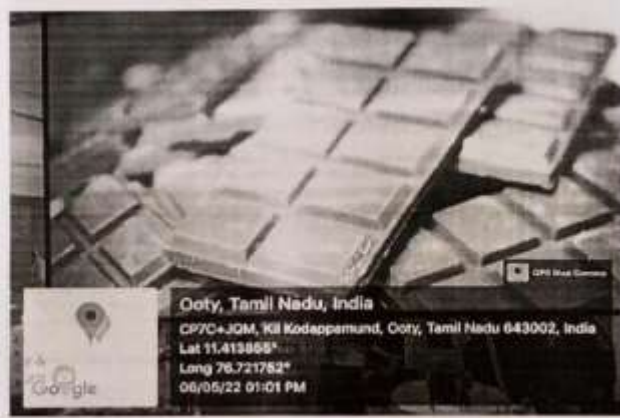

These are the processes in tea making. After seeing these processes we were given one cup of tea to have. We left the premises at 2:00 pm. It was an informative and interesting and a successful visit. As Management students we learned few marketing applications and even about machine working conditions.

Outcome:

Better understanding of the concepts.

Improved organising ability.

Objectives:

To learn about the Filing of GST, Income Tax, Tally With GST are applied are in the real world by the auditor.

Process:

1) GST Online Filing Process

* Use the GST Portal that is www.gst.gov.in.

* Based on your state code and PAN number, a 15 Digit number will be issued.

* Each invoice that you have needs to be uploaded. Against each invoice, a reference number will be issued.

* File the outward supply return of GSTR-I using the information section at the GST Common Portal on or before the 10th of the month.

*After this, Recipient has to verify the details of the outward supplies and file.

Supplier can accept or reject the details provided by the inward supplies made apparent in the GSTR-1A and GSTR-2.

2) Income Tax Filing [Offline]

Use the Income Tax e-Filing Portal, <https://www.incometax.gov.in/iec/foportal>.

Download the appropriate ITR utility under Download > IT Return Preparation Software.

Fill the applicable and mandatory fields of the ITR Form.

Validate all the tabs of the ITR Form and calculate the Tax.

Generate and save the XML.

Login to e-filing Portal by entering User ID [PAN], Password, captcha code and click Login.

Attach the ITR XML File.

Aadhaar OTP as verification option, enter the Aadhaar OTP received in the mobile number registered and VIDAI.

Submit the ITR.

To view the uploaded ITRs.

Outcome:

This way of experiential learning helps us to gain more knowledge and information about Tally, GST and Income Tax, It is very useful to us.

Through this field work, I learnt about the Income Tax, Tally, GST and how they file, about the processes done in auditor office and the work done by auditors in maintaining and verifying the accounts and also the filing process.

Title Experiential learning gained by visiting CA VIDHYA.S Chartered Accountant company

Objective The main objective of visiting CA VIDHYA.S Chartered Accountant company is to have some practical experience of working in a company. Before training we have only theoretical knowledge about work in organization. Now we have knowledge about the organization's working environment and how organizations work and achieve their goals and objectives.

Process This training gives us the understanding of business and also about the elements of strategic thinking, planning and implementation and how these things are applied in a real world organization environment.

The following are the main objectives that we have learned:

- To improve the communication skill
- To analyze the business situation
- To establish high standard in professionalism
- To learn more than the theoretical knowledge
- To apply the theoretical knowledge in actual organization

In this, we learned to prepare the partnership deed of different persons, in which different rules and regulations mentioned according to law. A partnership deed is also known as partnership agreement, is a document that outlines in detail the rights and responsibilities of all parties to a business operation. It has the force of law and is designed to guide the partners in the conduct of the business. It is helpful in preventing disputes and disagreement over the role of each partner in the business and the benefits which are due to them. The partnership deed normally carries the name of the business, the address of its principal place of business and a short summary of the business the partners intend to operate.

Outcome

The company is really good at everything and everything is well maintained and managed. The company since its very first day is devoted to providing quality services. The detailed and through review of work and clients trust shows the perfection with which is working.

The working environment is lenient in the company. Neither the employees are overburdened by the work given, neither they nor the proprietor force them to work for extra hours. All the targets are completed by the employees in the provided time frame.

Peoples always have room to grow, and advance behavioural skills are always welcomed. At the upper end, one can give your workers the tools and mindset to aim for improvement by observing the behaviour, work habits and production. Self-improvement training will help providing feedback and criticisms that they can use to benefit their next assignments. An essential part of promoting improvement is to communicate to the employees that failure.

Introduction:

The owner of the shop (GEE PEE SINGAPORE SHOP) is a wholesaler, he also acts as his own mercantile agent in his business. So he has all authority there.

His role as mercantile agent:

A Mercantile agent is the person who has authority to sell the goods or to buy goods or to raise money on the security of goods.

"Mercantile agent today plays a vital role in the transfer of goods from the producer to the ultimate consumer."

Classification of goods:

In business law, the Term goods refers to all movable property apart from actionable claims and money.

- * Existing goods.
- * Future goods.
- * Contingent goods.

Existing goods:

Here the products are come under existing goods. Existing goods are goods that physically exist and belong to the seller at the time of contract of sale. Divided into two categories.

- * Specific goods.
- * Unascertained goods.

Payment:

* We keep you ahead of change with the most up to date payment method offerings around the world.

* Credit cards. allow to draw on a line of credit to pay for goods and services.

* Debit cards.

* Direct debit and bank transfers.

Conclusion:

Thus we have learnt lot about mercantile agent and what are his role in a business.

CERTIFICATE

This is to certify that Ms.AZEEMA, Mr.VEERAROSHAN, Ms.KAVIYA, Ms.SWATHI, (212AKB07, 212AKB58, 212AKB24, 212AKB55) first year B.Com (PA) student of KG College of Arts and Science, Saravanampatti, Coimbatore-641035, has successfully completed the experiential learning in our shop (02.05.2022) to (07.05.2022). During the period of their training with us, we found their sincerity, hardworking.

We take this opportunity to thank them for learning new things at our place and wish them the best for their future endeavors.

Title : Experiential learning gained by visiting Potato factory.

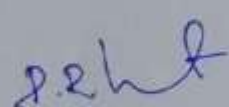

Objective : The objective of the Potato factory in Mettupalayam is that the students and general public, who visits the factory should also learn about supply quality planting materials of horticulture crops to farmers in a time bound manner.

Process : Market access as well as market efficiency is further constrained by the perishability of the products. Unless the market infrastructure and related systems function well, products that are more perishable tend to have relatively lower market efficiency. The perishability nature also limits the number of participants in the market. This is the case with potato in most developing countries.

The study used quantitative primary data collected in a cross-sectional survey from potato forming households and businesses located in selected major towns. Field observation of further validate the fielding were made. For formera the variables that were considered include potato marketing mode, that is, individual or group marketing, and constructual relationship with buyers.

Title : Brute Force Cracker

Objective : 1. To Recover Encrypted Files,Data Files,Or Andriod Device
2.Working of the software in the real time environment.

Process : 1. Simple brute force attack—uses a systematic approach to guess' that doesn't rely on outside logic.

2.Reverse brute force attack—uses a common password or collection of passwords against many possible usernames. Targets a network of users for which the attackers have previously obtained data.

3.Hybrid brute force attacks—starts from external logic to determine which password variation may be most likely to succeed, and then continues with the simple approach to try many possible variations.

4.Credential stuffing—uses previously-known password-username pairs, trying them against multiple websites. Exploits the fact that many users have the same username and password across different systems.

COORDINATOR SIGNATURE: *Malhar*

OBJECTIVE: The importance and full process
of tea production.

REPORT.

1. What you will do when insects affect in tea plant?

We have some medicines, because if there is insect in tea plant it also affect us. So we will apply medicine. Both in summer and rainy season.

2. What is the good climate for tea protection?

Throughout the year, all month we will increase tea production.

3. What time it take to produce a tea powder?

It takes around 8 hours, because it take some long process to make a tea powder.

4. What are the countries you export tea?

Like Russia, Sri Lanka etc all over the countries we export tea powder.

5. Do you like this work?

TEA - PRODUCTION. . . .

Tea is one of the most popular drinks in the world. Tea is the leading beverage consumed by the people in the world next to water. There is no supporting document regarding the countries and people who don't like tea ever. Tea occupies an important place in the world next to China.

In India tea is cultivated in many states like Assam, West Bengal, Himachal Pradesh, Mizoram, Tamil Nadu, Kerala, Karnataka etc. Tea export from Tamil Nadu and South India has declined over the years and average yield per hectare is the highest in Karnataka when compared to other tea producing states in South India.

Indian tea was very famous in the world tea market since about after the globalization policy, Indian tea was not able to withstand in the market. Many small tea producing nations like Kenya and Sri Lanka started dominating the entire tea market in the world.

Objectives of the study - The study has the following objectives.

* To study and compare the performance of tea industries in South India.

Amongst the tea producing states in South India, the share of Tamil Nadu is impressive when compared to the share of Kerala and Karnataka. In the year 2001, the total production of Tamil Nadu is 131.83 million kgs

Indian tea was very famous in the world tea market once about after the globalization policy, Indian tea was not able to withstand in the market. Many small tea producing nations like Kenya and Sri Lanka started dominating the entire tea market in the world.

Objectives of the study - The study has the following objective.

* To study and compare the performance of tea industries in South India.

Amongst the tea producing states in South India, the share of Tamil Nadu is impressive when compared to the share of Kerala and Karnataka. In the year 2001, the total production of Tamil Nadu is 131.83 million kgs.

and it has increased to 163.09 million kgs in 2015.

Nilgiri tea is a drink made by infusing leaves of *Camellia sinensis* that is grown and processed in the Nilgiris district in Tamil Nadu, India.

Almost 52% of the entire tea produced in India comes from the state of Assam with 652.9 million kilograms. Lakhimpur, Kamrup, Goalpara, Sivasagar, Cachar, Nagaon and Dibrugarh districts of state are major producers of tea.

Darjeeling is famous for its tea gardens.

A tea bush is from one to one-and-a-half meters in height. Tea leaves

are mostly hand-plucked every 5 to 10 days. It takes 70 to 90 days for the plucked shoot usually the top two leaves and a bud) to redevelop. An experienced person can pluck upto 50 kg of tea leaves a day. Four kilos of tea leaves are needed to make one kilo of black tea. One tea plant can produce 70 kg of black tea a year. An acre in a tea plantation in India yields from 450 kg to 680 kg.

How many kilos of tea leaves can be pluck
a single day?

An experienced person can pluck upto 30kgs per

By the topic of tea production we can
stand about it uses and importance. It gets
rapid development during this 21st Century.
The hardwork of the labours are
shown in it.

Yes, I like this work very much, we are
I like this work generation by generation. So,
like this work very much.

How many hours you work per day?

The working hours are fixed at eight hours
day starting at 9 am.

How many wages you get per day?

We will get around 300 rupees per day.

Is watering required in tea production?

In order to ensure the stable yield and
quality of tea, tea gardens need timely and
appropriate irrigation and fertilization.

How many days taken to plant a tea
plant.

It takes about 6-8 weeks to grow a
tea plant.

TITLE : **Ticketing Systems**

OBJECTIVES:

- To Manage the details of Ticket.
- To check the seat availability though online mode.

PROCESS:

- Software name is ORTS Ticketing System
- The software help to book ticket through online
- The timing and the seat availability can be viewed easily.

OUTCOME:

- Everyone can book their ticket from the home itself
- We can check the seat availability
- This software is very user friendly for the end users.

TICKETING SOFTWARE

- Software Name: ORTS Ticketing System.
- Company Name: Gowtham private limited
- Founder: Mr. Sirinivas Ragul . M
- Founded ORTS Ticketing System in 2019.
- Programming languages: CSS, PHP 4.4.
- Data base: MYSQL/Cloud.

- RAM: Minimum 512MB.
- Windows: Minimum Windows XP.
- Intel Processor: i3 5th Gen
- No Graphics needed.

1. INTRODUCTION

1.1. Problem

The required to migrate to a flexible ticketing system better than the current one, which can be easily to maintain; open source and can provide an easy way to follow and track issues through tickets.

1.2. Abstract

The following document is intended to provide an alternative choice for a helpdesk and development ticketing system for ADSCA technical support department

The document has the following sections:

1.3. Ticket systems

This section contains the analysis of each ticket system studied. In each subsection it will contain: Summary; Software/Hardware requirements; features; screenshot; advantages and disadvantages of the ticket system been analyzed with screenshots where is needed.

1.4. Discarded systems

This section has a list of system that was not included in the analysis and the reason why.

1.5. Conclusions and recommendations

In this section will be a result analysis of the tickets studied

2. Ticket Systems

2.1. OS Ticket

The screenshot displays the osTicket web interface. At the top left is the logo and text 'SUPPORTCENTER TICKET TRACKING'. On the right, there are navigation links: 'Main', 'Help', 'New Ticket', and 'Logout'. The main form area contains the following fields and controls:

- Full Name:** Text input with 'Softpedia' entered.
- Email Address:** Text input with 'softpedia@softpedia.com' entered.
- Telephone:** Empty text input.
- Department:** Dropdown menu with 'Support' selected.
- Subject:** Text input with 'Test' entered.
- Message:** Text area with 'Softpedia Test' entered.
- Priority:** Dropdown menu with 'Normal' selected.
- E-Mail:** Text input with 'softpedia@softpedia.com' entered.
- Ticket Number:** Text input with '1' entered.
- Buttons:** 'Open Ticket', 'Reset', and 'View Status'.

At the bottom of the form, it says 'Support Ticket System'. Below the form, there is a copyright notice: 'Copyright © 2005-2006 osTicket, Inc. All Rights Reserved.' and the osTicket logo with the text 'osTicket Powered'.

osTicket is a widely-used open source support ticket system. Integrates inquiries created via email and web-based forms into a simple easy to use multi-user web interface.

Easily manage, organize and archive all your support requests and responses in one place while providing your clients with accountability and responsiveness they deserve.

2.1.1. Summary

osTicket is an attractive alternative to higher-cost and complex customer support systems; simple, lightweight, reliable, open source, and easy to setup and use.

2.1.2. Software/ Hardware Requirements

- PHP 4.3+
- MySQL 4.4+

2.1.3. Features

Inquiries created via email, phone and web-based forms into a simple easy-to-use multi-user web interface

- Easy to use
- Organize and archives help request
- Light weight
- Open Source

2.1.4. Screenshots

The screenshot shows the SupportCenter Ticket Tracking web application. At the top left is the logo for SupportCenter, featuring a stylized animal head. To the right of the logo is the text 'SUPPORTCENTER TICKET TRACKING'. Below the logo is a navigation bar with links for 'Main', 'Help', 'New Ticket', and 'Logout'. Underneath the navigation bar are two search input fields labeled 'E-mail:' and 'Query:', followed by a 'Search' button and a link to '[Advanced]'. Below the search area is a section titled 'Open Tickets' which contains a table with columns for 'Ticket', 'Date', 'Subject', 'Category', 'Priority', 'From', 'Assigned To', 'Status', and 'URL'. Below the table are several action buttons: 'Select All', 'Unselect', 'Delete', 'Close', 'View Answered', 'View Closed', 'Refresh', 'Preferences', 'Responses', 'Categories', 'Representatives', 'User Groups', 'Ban List', and 'My Account'.

2.1.5. Advantages/Disadvantages 2.1.5.1 Advantages

- Easy to use
- Easy to maintain
- Lightweight
- Assign tickets to a staff and/or department.

2.1.5.2. Disadvantages

- Escalation functionality is not directly included, even if it has notifications on overdue
- I didn't find an automatic re assign ticket feature on overdue tickets.

2.2. OTRS (Open source Ticket Request System) 2.2.1 Summary

OTRS is an Open source Ticket Request System with features to manage customer telephone calls and e-mails. The system is built to allow your support, sales, pre-sales, billing,

internal IT, helpdesk, etc. department to react quickly to inbound inquiries. Receive 5,000 e-mails a day and still be able to handle them

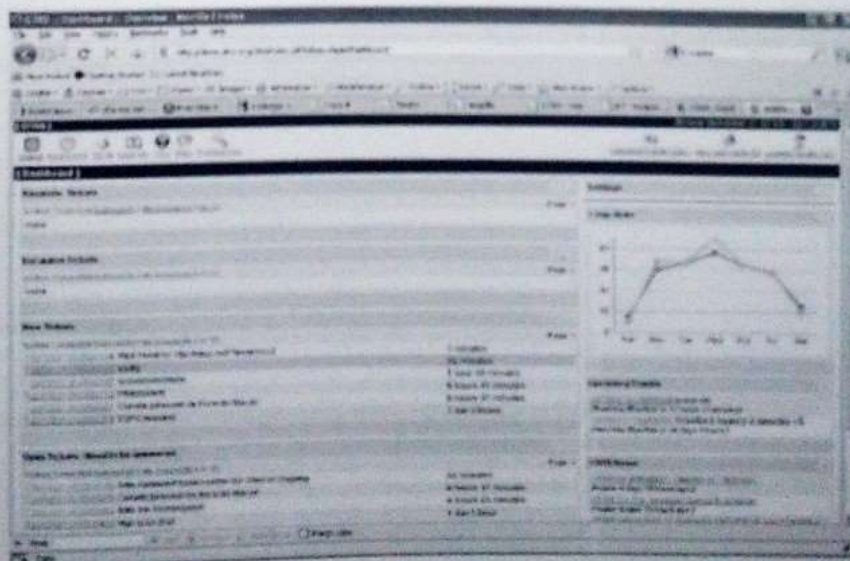

2.2.2. Software / Hardware requirements.

- GNU
- Tested on Linux, Solaris, AIX, FreeBSD, OpenBSD, Mac OS 10.x and Windows.
- Mysql
- Perl based.

2.2.3. Features

- Escalation
- Reports and search by different criteria's
- Group's permissions

2.2.4. Screenshots

2.3. RT – Request Tracker 2.3.1. Summary

RT is an open source issue tracking and workflow platform which enables a group of people to intelligently and efficiently manage tasks, issues, and requests submitted by a community of users. It is widely used as an helpdesk system.

The RT platform has been under development since 1996, and is used by systems administrators, customer support staffs, IT managers, developers and marketing departments at thousands of sites around the world.

Written in object-oriented Perl, RT is a high-level, portable, platform independent system that eases collaboration within organizations and makes it easy for them to take care of their customers.

RT manages key tasks such as the identification, prioritization, assignment, resolution and notification required by enterprise-critical applications including project management, help desk, NOC ticketing, CRM and software development.

RT is used by Fortune 100 companies, government agencies, educational institutions, and development organizations worldwide.

2.3.2. Software/ Hardware Requirements 2.3.3. Features

Track critical data

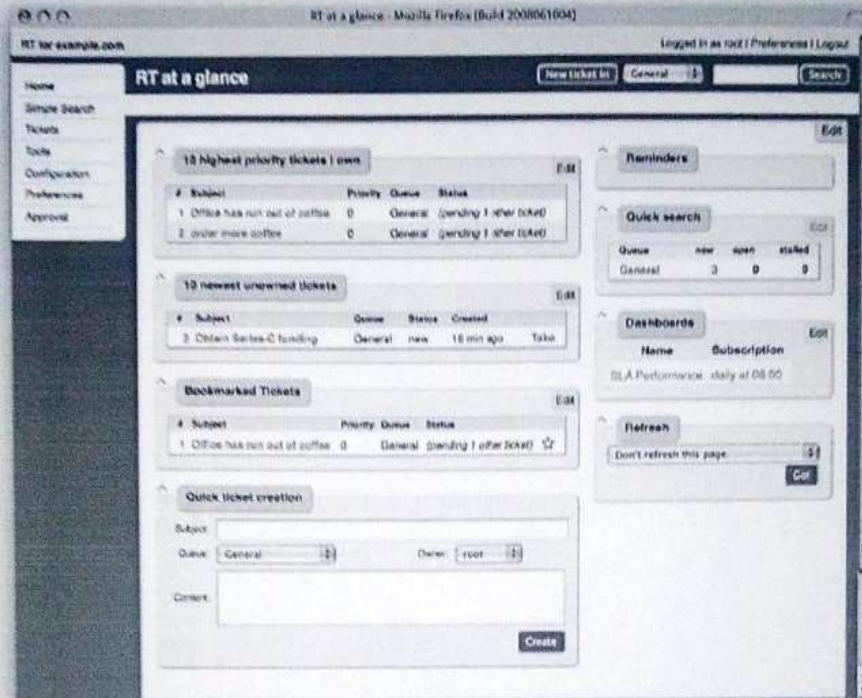

- It's easy to submit, assign, prioritize, search, escalate, and report on issues.
- RT keeps track of each ticket's full history and metadata to help your organization better retain knowledge and analyze trends.

- RT can track multiple projects for multiple teams within a single installation.
- RT tracks critical system metadata, including time spent per action, due dates, and estimated time to completion.
- It's easy to record private comments that are not available to end-users.
- RT's web interface comes complete with an intuitive "iterative" search interface that allows end users to construct complex queries by pointing and clicking within their web browsers.
- Users can save and edit queries later, using their browser's "bookmarks" feature.
- Convenient for end users. For instance, RT provides a simple, self-service interface that allows end users to view their own active and resolved tickets online

Easy to customize Security

- RT has a built-in access control system that lets administrators grant user, group, and role-based rights to users.
- Users can be made members of groups for the purpose of access control. These groups are hierarchical, making it easy for administrators to manage access to the system. o Rights can be granted globally or only to specific parts of your RT system.
- Users can be allowed the right to delegate rights that they have been granted.
- RT can use your web server's existing authentication system or its own internal password database to grant or deny users' access to RT.
- Easy to install Platform Independent

Title : Role of Electronics in the rehabilitation center

Objective:

- To know the importance of role of electronic instruments in rehabilitation center
- To understand the various procedures in the rehabilitation techniques.
- To innovate the new concepts

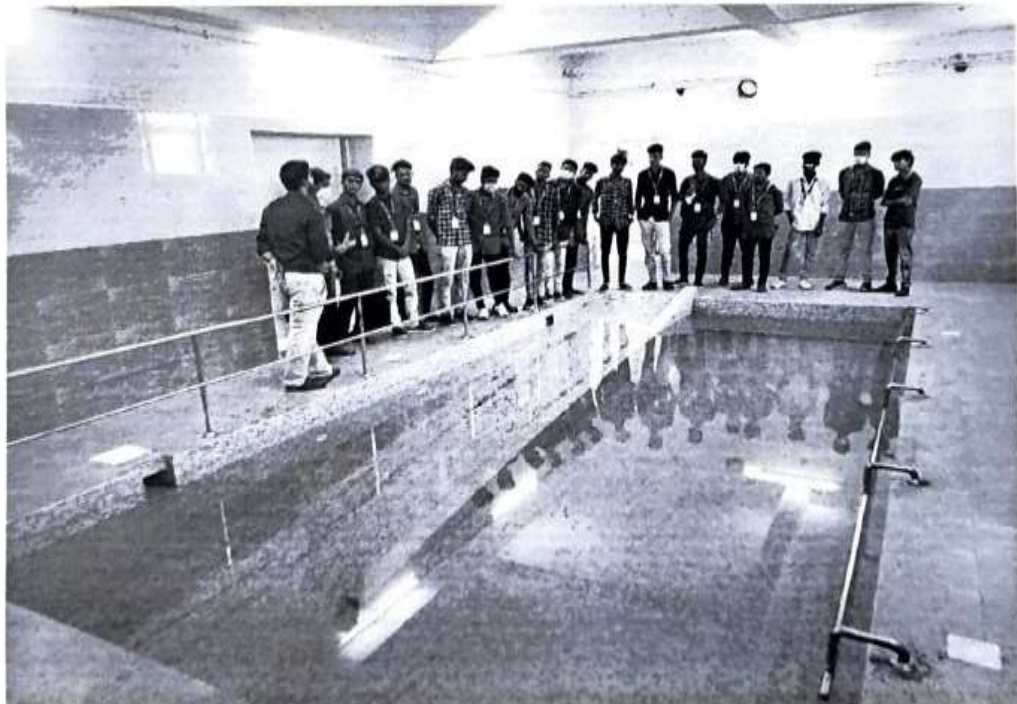

Process:

- Visiting the Soulfree Inspire Center
- Know the process of rehabilitation methods
- Acquiring the knowledge about the technologies implemented for the rehab patients

Outcome:

Understood the various therapies used for the rehab patients. Knew the importance of electronics in the field of rehabilitation. Magnetic therapy has been used for the improvement of spinal injured patients.

Title : Isolation of DNA from Bird sample and amplification in PCR

Objective :

- To know the importance of DNA isolation in Forensic science.
- To understand the various steps in DNA isolation
- To amplify the isolated DNA in PCR

Process :

- Visiting the SACON- Forensic laboratory
- Know the process of DNA sample collection
- Acquiring the knowledge about the isolation of DNA from the bird sample
- Understanding the steps and precautions to be taken in PCR.

Outcome :

Understood the sample collection process and sample storage. Knew the various steps in DNA isolation and the role of various chemicals in isolation of DNA. Also understood critical steps in DNA amplification.

Title : Experiential learning gained by visiting G D Naidu museum and industrial exhibition.

Objective : The main objective of the museum is that the students and general public should learn about the technology behind it and the person responsible for such innovations, either in design or engineering or in workmanship, etc.

Process : The G.D. Naidu Museum and industrial exhibition in The G.D. Car Museum, run by the G.D.Naidu trust has opened its gates to the public in the City of Coimbatore in South India. The museum aims to inculcate the spirit and interest of engineering in the minds and hearts of the public by taking them through a well laid of display of automotive and technological evolution.

The idea of a motoring or a car museum in India is one that us petrolheads have longed for. There are of course a few private collections on display in Ahmadabad and recently in Goa and the Transport Museum in Gurgaon, a museum that transcends the evolution of the automobile in its rawest sense never existed. The all-new Gedee Car Museum in

the city of Coimbatore in South India is exactly that, a showcase of evolution rather than just a static display of cars.

In 1970, the government wanted to build affordable house for the rural people. The president of India Mr V V Giri wanted a cheap method of building houses which were functional and fast to build and used only materials that were locally available.

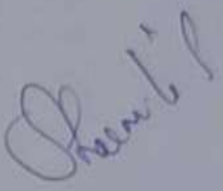

In that construction Mr Naidu worked out a plan of low-cost houses, in four different models, which could be built with in a day. The cost also was kept very low he also provided a training program for the masons to build the lower cost house.

From an exact working and accurate replica of the 1886 Benz Patent Motorwagen to the likes of a phenomenal Hispano Suiza h6B that graced the 2015 Cartier Concours d'Elegance, the museum boasts a large collection of cars that transcends the history of the automobile. Cars like the Ford Model T, the first mass produced car in the world, the Volkswagen Beetle, the first real people's car and the Morris Mini, the first transverse engine car, are all on display at the museum

Henry Ford, introduced the first mass produced car, the Ford T in Detroit USA. It had a 22 horsepower in line four cylinder engine and could go as fast as 40 mile per hour and ran on gasoline or hemp based fuel. Any customer can have a car painted in any color as long as it is black.

Title:

Software involving in electroplate organization.

Objective:

1. To find out about this present reality programming and its process, used toward the end client
2. Area information about the prerequisites of the business in groups of utilization innovation, cost and so forth.
3. Working of the product in the continuous climate.

Process:

1. Electroplate organization has the product where the for charge the thing what's more, keep up with the sets of the organization. As indicated by the client needs in kept up with and buy as bill and orders to the Customer.
2. Old stock presentation in the product.
3. Section for new item buy in the electroplate organization.
4. All credit client subtleties are put away and their deals history have a record in the product.
5. The administrator need to take care of the detail of the new item and the old item Price changes detail so just the item will be sold in the appropriate cost.
6. All the old and new stock and the recorded in the product.

Outcome:

- In this field work, learnt about
 - Client details,
 - Old stock presentation,
 - New item buy in the electroplate organization,
 - Administration process,
 - Maintain old and new stock .
- Gathering the knowledge about how the software are involved and its importance in Electroplate organization.

Mr. Antony M R
62,Lakshmi Nagar Phase 2,
Kalapatty post Coimbatore-48

Dear Antony,

With reference to your application and subsequent interview with us, we are pleased to appoint you in our Company as **LI-Associate Trainee**. The terms and conditions of your appointment are given below:

Training Period:

This employment offer is a unique, career-based engagement enabling graduates to become full-fledged Software Professionals in the resource stream of HTC Global Services (India) Private Ltd., (hereinafter to be referred to as "HTC"). You will be trained in the area of Information Technology for a period of three (3) months from the date of your employment and thereafter you will be placed in the Company projects subject to your competence and availability of such projects as per the discretion of the Company, with a commitment and obligation from you to serve HTC or any of its group or affiliated companies ("Company" or "HTC") as an employee for a minimum period of two (2) years .("Commitment Period" (i.e. 2 years including 3 months of training).

-
- You will be periodically evaluated during the training program through tests, projects and interviews.
- Apart from the evaluation of your on-the-job training, deputation to any project will depend on your attendance, overall behavior and performance during the training period.
- The terms and conditions of training is detailed in **Annexure-B**.

Employment Terms and Conditions:

Your base training location will be Chennai. On successful completion of training, HTC reserves the right to transfer/depute you to any of its department(s), technologies, offices, or client locations in India / Overseas.
