

## KC College of Arts and Science

Autonomous Institution | Affiliated to Bharathiar University
ISO 9001-2015 Certified Institution

## **Regulations 2024-25 for Postgraduate Programme**

Learning Outcomes Based Curriculum Framework (LOCF) model with

Choice Based Credit System (CBCS)

Programme: M.Sc. Computer Science (M.Sc. CS)
Programme Code: MCS

(Applicable for the Students admitted during the academic year 2024-25 onwards)

#### **Eligibility**

The student should have passed B.Sc. Computer Science / BCA / B.Sc. Computer Science related Courses / B.E. / B.Tech. Computer Science related course is eligible for M.Sc. Computer Science. (As per the eligibility condition given by Bharathiar University Ref. BU/R/B3-B4/Eligibility Condition /2024/9206 dated 24/5/2024).

#### **Program Learning Outcomes (PLOs)**

The successful completion of the M.Sc. Computer Science programme shall enable the students to:

| PLO1 | Develop critical analysis with creativity and problem solving skills in Computational Science to become Data Scientist and Data Analyst.   |
|------|--|
| PLO2 | Exhibit research skills, design and critical thinking to embellish the career of computer System Analyst, Software Engineer and Scientific Researcher to solve real world problem. |
| PLO3 | Continue the process of life-long learning through professional activities and adapt themselves persuasively in Full Stack Development, AI and Cloud Computing.                    |
| PLO4 | Enhance skills for effective leadership in IT support, Network Architect, Web Development and successful entrepreneur as well.   |
| PLO5 | Apply ethical principles through human computer interaction and contribute effectively to the welfare of the society.  |

M.Sc. Computer Science

#### **Distribution of Credits and Hours for all the Semesters**

| Part | Course Category No. of Courses Hours                              |   | Credits |    | tal<br>dits | Semester |    |       |
|------|---|---|---------|----|-------------|----------|----|-------|
|      | Core Theory (5 hrs./week)   | 5 | 5 X 5   | 25 | 4 X 5       | 20       |    | 2 - 3 |
|      | Core Theory (4 hrs./week)   | 5 | 5 X 4   | 20 | 4 X 5       | 20       |    | 1     |
|      | Core Lab (4 hrs./ week)   | 6 | 6 X 4   | 24 | 6 X 3       | 18       |    | 1 - 3 |
| III  | Elective Theory (5 hrs./ week)                                    | 1 | 1 X 5   | 5  | 1 X 4       | 4        | 84 | 3     |

# Semester 1

#### Semester - 1

| Course Code | Course Name                       | Category | Hours / Week | Credits |
|-------------|-----------------------------------|----------|--------------|---------|
| 24MCS11C    | Analysis and Design of Algorithms | Core - I | 4            | 4       |

## **Course Objectives**

This course intends to cover

- Elementary data structures.
- Various techniques such as divide and conquer, dynamic programming, backtracking.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |  |  |  |  |
|------|---|--------------------|--|--|--|--|
| CLO1 | Recite the elementary data structures.                                  | K1                 |  |  |  |  |
| CLO2 | Understand the traversal and search techniques.                         | K2                 |  |  |  |  |
| CLO3 | Apply the Greedy method in various applications.                        | К3                 |  |  |  |  |
| CLO4 | Analyze the dynamic programming techniques.                             | K4                 |  |  |  |  |
| CLO5 | Evaluate the concept of backtracking, branch and bound techniques.      | K5                 |  |  |  |  |
|      | K1 – Remember; K2 - Understand; K3 - Apply; K4 – Analyze; K5 – Evaluate |                    |  |  |  |  |

**CLO – PLO Mapping** 

| CLOs/PLOs              | PLO1 | PLO2        | PLO3       | PLO4      | PLO5     |
|------------------------|------|-------------|------------|-----------|----------|

|-------------|--------------------|-----------|--------------|---------|
| 24MCS12C    | Python Programming | Core - II | 4            | 4       |

The course intends to cover

- Elementary data structures of Python programming.
- Modules to perform specific task.
- Python libraries and frameworks for rapid application development.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |  |  |  |  |
|------|---|--------------------|--|--|--|--|
| CLO1 | Recite the basic concepts of Python.                                  | K1                 |  |  |  |  |
| CLO2 | Understand the Object-Oriented concepts and modules in Python.        | K2                 |  |  |  |  |
| CLO3 | Analyze the data storage, databases, web and network applications.    | K4                 |  |  |  |  |
| CLO4 | Build real time applications using Python libraries.                  | К3                 |  |  |  |  |
| CLO5 | Create an application through Python frameworks Django and Flask.     | K6                 |  |  |  |  |
| ,    | K1 - Remember; K2 - Understand; K3 - Apply; K4 – Analyze; K6 - Create |                    |  |  |  |  |

## **CLO – PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2        | PLO3       | PLO4             | PLO5 |  |
|------------------------|------|-------------|------------|------------------|------|--|
| CLO1                   | 2    | 2           | 3          | -                | 3    |  |
| CLO2                   | 2    | 3           | 3          | -                | 3    |  |
| CLO3                   | 2    | 3           | 3          | -                | 3    |  |
| CLO4                   | 3    | 3           | 3          | 1                | 3    |  |
| CLO5                   | 3    | 3           | 3          | 1                | 3    |  |
| 3 - Substantial (high) |      | 2 - Moderat | e (medium) | 1 - Slight (low) |      |  |

## **Core – II : Python Programming**

| Unit | Content   | No. of<br>Hours |
|------|---|-----------------|
| I    | Introduction: Numbers – Strings – Variables – Lists – Tuples – Dictionaries – Sets– Comparison. Code Structures: if, elseif, and else – Repeat with while – Iterate with for – Comprehensions – Functions – Generators – Decorators – Namespaces and Scope – Handle Errors with try and except – User Exceptions.   | 12              |
| II   | Modules and Programs: Standalone Programs – Command-Line Arguments – Modules and the import Statement – The Python Standard Library. Objects and Classes: Define a Class – Inheritance – Override a Method – Add a Method – Get and Set Attribute Values with Properties – Method Types– Special Methods.   | 10              |
| III  | Storing and Retrieving Data: File Input/Output – Structured Text Files – Structured Binary Files. Database Programming using Python: Connecting to a database (sqlite, mysql) using Python, Sending DML and DDL queries and processing the result from the Python Program. Web: Web Clients – Web Servers – Web Services and Automation. Networks: Patterns – The Publish-Subscribe Model – TCP/IP – Sockets – Internet Services.                           | 12              |
| IV   | <b>NumPy</b> : Operations using NumPy - NumPy for Arrays - Data Type Objects (dtype) - NumPy Mathematical Operations. Pandas: Key Features of Pandas - Pandas data structures - series and DataFrame - Loading a dataset into a dataframe - Selecting columns and rows from dataframe - Adding new data and deleting data from a dataframe. Matplotlib: Use of Matplotlib - Types of Plots - Working with multiple Plots.                                   | 13              |
| V    | Python Frameworks: Frameworks - Types of Python Frameworks - Django: Install Django - Web frameworks - The development server - Model-view-controller vs Model view template - Initial Setup - First Django project - Create an app - URL confs - Pages app. Flask: Introduction to Flask - Installation - Basic Application Structure - Initialization - Routes and views function - Server startup - A Complete application - The Request-Response cycle. | 13              |
|      | Total Hours   | 60              |

| Course Code | Course Name | Category   | Hours / Week | Credits |
|-------------|-------------|------------|--------------|---------|
| 24MCS14C    | MongoDB     | Core - III | 4            | 4       |

The course intends to cover

- MongoDB fundamentals such as databases, collections and CRUD operations.
- Indexing strategies to improve query performance.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |  |  |
|------|---|--------------------|--|--|
| CLO1 | Understand NoSQL Database and differences with RDBMS and CAP Theorem.     | K1, K2             |  |  |
| CLO2 | Apply data modelling and schema validation.                               | К3                 |  |  |
| CLO3 | Analyze the requirement and design the MongoDB documents and collections. | K4                 |  |  |
| CLO4 | Understand the aggregation operators in MongoDB.                          | K2                 |  |  |
| CLO5 | Create Shards in MongoDB.   | K6                 |  |  |
| K1   | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K6 - Create     |                    |  |  |

## **CLO-PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2         | PLO3       | PLO4      | PLO5    |
|------------------------|------|--------------|------------|-----------|---------|
| CLO1                   | 2    | 3            | 3          | 2         | 2       |
| CLO2                   | 3    | 3            | 3          | 2         | 3       |
| CLO3                   | 3    | 3            | 3          | 3         | 3       |
| CLO4                   | 2    | 3            | 3          | 2         | 2       |
| CLO5                   | 3    | 3            | 3          | 3         | 2       |
| 3 - Substantial (high) |      | 2 - Moderate | e (medium) | 1 - Sligh | t (low) |

## Core - III : MongoDB

| Unit   | Content  | No. of<br>Hours |
|--------|--|-----------------|
| I      | Introduction to NoSQL: Types of NoSQL Databases – MongoDB – Differences between MongoDB and RDBMS – CAP theorem – JSON – BSON – MongoDB document.  | 10              |
| II     | MongoDB Installation and Data Modeling: Databases and collections-<br>Introduction to MongoDB shell-Configuring MongoDB shell-Accessing the<br>MongoDB shell-Understanding data types - MongoDB data modeling-Embedded<br>data model-References data model-Perform schema validations.   | 12              |
| III    | CRUD Operations: Introduction to CRUD operations - creating databases and collections-Insert operation-Ready operation-Update operation- Delete operation. Additional CRUD Related Methods: Overview of CRUD methods - insert() method-update()method-find()method-findOneandDelete()method-findOneAndReplace() method-findOneAndUpdate() method - findAndModify() method.   | 12              |
| IV     | <b>Aggregation:</b> Aggregation operators-Aggregation stage operators-Expression operators: Expression arithmetic operators- Set expression and array operators- Expression boolean operators - Expression comparison operators- Expression date operators- Expression string operators.   | 12              |
| V      | Indexes and Performance Tuning: Different types of Indexes-Index Creation-listing the indexes-Default_Id index-Drop an Index-Single Field Index - Compound Index. Introduction to Storage and Storage Engine: WiredTiger/In-Memory Storage Engine. Introduction to MongoDB Sharding: Advantages of sharding- Architecture overview- development, continuous deployment and staging environments-Planning ahead on sharding – Shard key – Choosing a Shard key. | 14              |
|        | Total Hours  | 60              |
| Text B | ooks   |                 |

| 24MCS16C    | Advanced Operating<br>Systems | Core - IV | 4            | 4       |

The course intends to cover

- Different types of operating systems and their functions.
- Components and management aspects of real time and mobile OS.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |  |  |  |
|------|--|--------------------|--|--|--|
| CLO1 | Recite the different kinds of operating systems and process scheduling.    | K1                 |  |  |  |
| CLO2 | Understand the design issues associated with distributed operating system. | K2                 |  |  |  |
| CLO3 | Interpret the concepts of real time operating system and task scheduling.  | K2                 |  |  |  |
| CLO4 | Explore the operating systems for handheld systems.                        | K4                 |  |  |  |
| CLO5 | Analyze operating systems like LINUX and iOS.                              | K4                 |  |  |  |
|      | <b>K1</b> – Remember; <b>K2</b> – Understand; <b>K4</b> – Analyze          |                    |  |  |  |

## **CLO-PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2         | PLO3     | PLO4      | PLO5    |
|------------------------|------|--------------|----------|-----------|---------|

|-------------|------------------------------|--------------|--------------|---------|
| 24MCS1AE    | Exploratory Data<br>Analysis | Elective - I | 4            | 4       |

The course intends to cover

- Methods for data preparation and data understanding.
- Techniques such as correlation analysis, time series and dimensionality reductions.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |  |  |  |
|------|--|--------------------|--|--|--|
| CLO1 | Understand missing data in the real-world data sets by choosing appropriate methods. | K1, K2             |  |  |  |
| CLO2 | Apply the data transformation techniques.  | К3                 |  |  |  |
| CLO3 | Analyze the correlation and time series.   | K4                 |  |  |  |
| CLO4 | Explain the importance of clustering algorithms and outlier detection.               | K5                 |  |  |  |
| CLO5 | Evaluate dimensionality reduction and model development.                             | K5                 |  |  |  |
| I.   | K1 Remember: K2 Understand: K3 Apply: K4 Applyze: K5 Evoluate                        |                    |  |  |  |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate

## **CLO-PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2      | PLO3          | PLO4     | PLO5      |

| 3 - Substantial (high) |      | 2 - Moder | rate (medium) | 1 - Slig | ght (low) |

**Elective - I : Exploratory Data Analysis** 

| Unit   | Content   | No. of<br>Hours |
|--------|---|-----------------|
| I      | Introduction to Exploratory Data Analysis: Steps in EDA, Data Types, Numerical Data – Discrete data, continuous data – Categorical data – Measurement Scales: Nominal, Ordinal, Interval, Ratio – Comparing EDA with classical and Bayesian Analysis – Software tools for EDA.  | 10              |
| II     | <b>Data Transformation:</b> Transformation Techniques: Performing data deduplication - replacing values — Discretization and binning. Introduction to Missing data, handling missing data: Traditional methods - Maximum Likelihood Estimation  | 10              |
| III    | Correlation Analysis and Time Series Analysis: Types of analysis: Univariate analysis - bivariate analysis - multivariate analysis. Time Series Analysis (TSA): Fundamentals of TSA - characteristics of TSA - Time based indexing - visualizing time series - grouping time series data - resampling time series data.   | 12              |
| IV     | Clustering Algorithms: Introduction to Spectral clustering – Document clustering – Minimum Spanning Tree clustering. Overview of Model-based clustering – Expectation-Maximization algorithm – Hierarchical Agglomerative model-based clustering. Outlier detection using Clustering.   | 12              |
| V      | Dimensionality Reduction: Linear Methods: Principal Component Analysis (PCA) – Singular Value Decomposition – Factor Analysis -Intrinsic Dimensionality. Non Linear methods: Multidimensional Scaling – Manifold Learning – Self-Organizing Maps. Model Development and Evaluation: Constructing linear regression model – evaluation – computing accuracy – understanding accuracy. Understanding reinforcement learning: Difference between supervised and reinforcement learning – Applications of reinforcement learning. | 16              |

| 24MCS1BE    | Blockchain Technology and Applications | Elective - I | 4            | 4       |

The course intends to cover

- Fundamentals of blockchain and crypto currency.
- Blockchain security features and its significance.
- Problems and challenges in blockchain

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |  |  |
|------|---|--------------------|--|--|
| CLO1 | Reminisce blockchain technology and understand crypto currency. |                    |  |  |
| CLO2 | Understand the mining mechanism in blockchain.                  | K2                 |  |  |
| CLO3 | Apply the Cryptocurrency and trust model.                       | К3                 |  |  |
| CLO4 | Interpret the Crypto economics and Cryptocurrency regulations.  | K2                 |  |  |
| CLO5 | Analyze the challenges and opportunities in blockchain.         |                    |  |  |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze        |                    |  |  |

**Elective- I: Blockchain Technology and Applications** 

| Unit   | Content   | No. of<br>Hours |  |
|--------|---|-----------------|--|
| I      | Introduction to Blockchain: The big picture of the industry – size, growth, structure, players. Bit coin versus Crypto currencies versus Blockchain - Distributed Ledger Technology (DLT). Strategic analysis of the space – Blockchain platforms, regulators, application providers. The major application: currency, identity, chain of custody | 12              |  |
| II     | <b>Features of Blockchain</b> : Advantage over conventional distributed database — Blockchain Network, Mining Mechanism, Distributed Consensus, Blockchain 1.0, 2.0 and 3.0 — transition, advancements and features. Privacy, Security issues in Blockchain.  | 12              |  |
| III    | Cryptocurrency - History, Distributed Ledger, Bitcoin protocols - Symmetric-key cryptography - Public-key cryptography - Digital Signatures -High and Low trust societies - Types of Trust model: Peer-to-Peer, Leviathan, and Intermediary. Application of Cryptography to Blockchain  | 12              |  |
| IV     | Cryptocurrency Regulation - Stakeholders, Roots bit coin, Legal views - exchange of cryptocurrency - Black Market - Global Economy. Cyrpto Economics: assets, supply and demand, inflation & deflation - Regulation   | 12              |  |
| V      | Opportunities and challenges in Blockchain: Application of Blockchain - Industry 4.0 – machine to machine communication –Data Management Industry 4.0 – future chain in Health 4.0 – Blockchain properties - Healthcare Costs - Healthcare Quality - Healthcare Value - Challenges for using Blockchain for healthcare data                       |                 |  |

|-------------|---|--------------|--------------|---------|
| 24MCS1CE    | Data Preprocessing and<br>Visualization | Elective - I | 4            | 4       |

The course intends to cover

- Different types of databases.
- Data cleaning levels for data preprocessing.
- Data visualization using Python with 2D and 3D plotting.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |
|------|--|--------------------|
| CLO1 | Understand the basic concepts of data and types of databases.          | K1, K2             |
| CLO2 | Apply various levels of data cleaning in data preprocessing.           | К3                 |
| CLO3 | Interpolate data integration and data reduction.                       | К3                 |
| CLO4 | Explore the data transformation and visualization skills using Python. | K4                 |
| CLO5 | Infer advanced plotting techniques using matplotlib library in Python. | К3                 |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze               | 2                  |

## **CLO - PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2        | PLO3       | PLO4    | PLO5      |
|------------------------|------|-------------|------------|---------|-----------|
| CLO1                   | 2    | 2           | 2          | 1       | 1         |
| CLO2                   | 2    | 2           | 2          | -       | 2         |
| CLO3                   | 3    | 3           | 2          | 1       | 2         |
| CLO4                   | 3    | 3           | 1          | -       | 3         |
| CLO5                   | 3    | 3           | 1          | -       | 3         |
| 3 - Substantial (high) |      | 2 - Moderat | e (medium) | 1 - Sli | ght (low) |

Elective – I: Data Preprocessing and Visualization

| Unit   | Content   | No. of<br>Hours |
|--------|---|-----------------|
| I      | Introduction: Data, Information, Knowledge and Wisdom (DIKW) pyramid – DIKW for data analytics – Data Preprocessing for data analytics versus machine learning – Data Objects – Data Attributes – types of data values – Information versus Pattern - Databases – Types of Databases – Connecting to, and pulling data from databases.  | 11              |
| II     | <b>The Preprocessing</b> : Purpose of data analytics – Tools for data analytics - Levels of data cleaning –Mapping the purposes and tools of analytics to the levels of data cleaning – Cleaning up the table –Unpacking columns and reformulating the table – restructuring the table – Missing values – Outliers – Errors.  | 11              |
| III    | Data Fusion and Data Integration: Data fusion versus Data integration — Directions of data integration — Entity identification — Unwise data collection — Index mismatched formatting — Aggregation mismatch — Duplicate data objects — data redundancy. Data Reduction: Objectives of data reduction — distinction between data reduction and data redundancy — Random sampling — Stratified sampling — Random over/under sampling — Performing dimensionality data reduction.   | 14              |
| IV     | Data Transformation and Massaging: Normalization and standardization — Binary coding, ranking transformation and discretization — Attribute construction — Feature extraction — Log transformation — Smoothing, aggregation and binning. Data Visualization: Data visualization in Python — Matplotlib for data visualization —Matplotlib figure with two subplots — Saving plots to file — Customize plot — Changing line and marker styles — Adding annotations and text — Creating subplots — Adjusting axis limits and tick marks — Using color maps. | 12              |
| V      | Advanced Plotting Techniques 2D: Bar plot – Histogram – Box plot – Violin plot – Area plot – Stacked area plot –Polar plot – Pie chart – Heatmap – Contour plot – Hexbin plot – Stream plot. Advanced Plotting Techniques 3D: Surface terrain plot – Quiver plot – Tri-surface plot – Wireframe plot – Ribbon plot – Delaunay Triangulation plot – 3D polar plot – 3D Scatter plot – 3D Vector plot – Animated plot.  | 12              |

## **Part – IV : Ability Enhancement Compulsory Courses**

(All the Postgraduate Programmes)

| Course Code | Course Name           | Category | Hours/Week | Credits |
|-------------|-----------------------|----------|------------|---------|
| 24QUA1AE    | Quantitative Aptitude | AECC - I | 2          | 2       |

#### **Course Objectives**

The course intends to cover

- Basic concepts of numbers, time and work, interests, data representation and graphs
- Concepts of permutation, probability, discounts, percentage & profit loss.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   |           |  |  |  |  |
|------|--|-----------|--|--|--|--|
| CLO1 | Remember and Understand the concepts of numbers and average                              | K1, K2    |  |  |  |  |
| CLO2 | Understand about percentage and apply profit & loss related processing.                  | K2, K3    |  |  |  |  |
| CLO3 | To understand the concepts of time and work and interest calculations.                   | K2        |  |  |  |  |
| CLO4 | To understand about the concepts of permutation, combination and probability.            | K2        |  |  |  |  |
| CLO5 | Understand, Apply and analyze the concept of problem solving involved in graphs and age. | K2,,K3,K4 |  |  |  |  |
| K    | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze                                 |           |  |  |  |  |

## Ability Enhancement Compulsory Course(AECC) - I: Quantitative Aptitude

| Unit  | Content  | No. of<br>Hours |
|-------|--|-----------------|
| I     | Numbers - Simplification - BODMAS rule - Algebraic formulas - Decimal fractions - Square root and cube roots - Surds and indices - Divisibility rules - HCF and LCM - same remainder - different remainder - application problems - average - equation - mistaken value - replacement - including/excluding.   | 6               |
| II    | Percentage - increase/decrease - netchange - salary - election - marks - consumption - population / machine - profit and loss - profit and loss % - finding cp and sp - profit=loss - same product cp and sp with percentage - discount - ratio and proportion - divided into parts - based on numbers - increase/decrease/income / expenditure - coins - partnership.   | 6               |
| III   | Time-and-work - individual/combined - alternative days - remaining work - efficiency based - amount split - chain rule - group of male and female or boys - pipes and cistern - finding time - efficiency based - alternative - remaining part - capacity of the tank - simple interest - finding principal - rate of interest - amount - time period - doubles or triples - compound interest - finding rate - finding time, principal - doubles or triples - difference between SI and CI. | 6               |
| IV    | Permutation - finding value - vowels come together - vowel never comes together -some letters come together - no two vowels come together - vowels in odd/even places - based on repetition - circular permutation - application - combination - finding value and application - probability - coins - dice-cards - balls and miscellaneous problems - odd man out and number series.  | 6               |
| V     | Clock - finding angle - reflex angle - gain or loss - calendars - finding particular day - data interpretation - bar chart - line chart - pie chart - table - combined -ages ratio-twice or thrice - addition /subtraction - family based - problems on numbers - equations.   | 6               |
|       | Total Hours  | 30              |
| Text  | Book   |                 |

## **Components for and Distribution of Marks for ESE (Theory)**

## **Ability Enhancement Compulsory Course(AECC)**

| Duration in Hrs. | Mode of exam | Type of questions | No. of questions | Marks   |
|------------------|--------------|-------------------|------------------|---------|
| 2                | Online       | MCQ               | 50               | 50x1=50 |

# Semester 2

#### Semester - 2

| <b>Course Code</b> | Course Name               | Category | Hours / Week | Credits |
|--------------------|---------------------------|----------|--------------|---------|
| 24MCS21C           | Advanced Java Programming | Core - V | 5            | 4       |

#### **Course Objectives**

The course intends to cover

- Advanced concepts of Java programming.
- JDBC, Servlet packages, Java Server Pages and JAR file formats.
- GUI based program using swing concepts.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |  |  |
|--|---|--------------------|--|--|
| CLO1   | Recite the basic and networking concepts of Java Programming.           | K1                 |  |  |
| CLO2   | Understand the remote method invocation.                                | K2                 |  |  |
| CLO3   | Infer Java with databases and Hibernate.                                | К3                 |  |  |
| CLO4   | Analyze Servlet and evaluate JSP for client and server web application. | K4, K5             |  |  |
| CLO5   | Create interactive applications using advanced techniques.              | K6                 |  |  |
| K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create |   |                    |  |  |

## **CLO - PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2        | PLO3       | PLO4      | PLO5    |
|------------------------|------|-------------|------------|-----------|---------|
| CLO1                   | 2    | 1           | 3          | 2         | 2       |
| CLO2                   | 3    | 2           | 1          | 3         | 3       |
| CLO3                   | 1    | 3           | 2          | 2         | 3       |
| CLO4                   | 2    | 3           | 3          | 1         | 2       |
| CLO5                   | 3    | 2           | 3          | 3         | 3       |
| 3 - Substantial (high) |      | 2 - Moderat | e (medium) | 1 - Sligh | t (low) |

## Core V - Advanced Java Programming

| Unit | Content  | No. of<br>Hours |  |  |  |  |  |
|------|--|-----------------|--|--|--|--|--|
| I    | Introduction: Java Basics Review: Components and event handling – Threading concepts. Java Networking: Network Basics and Socket overview - TCP/IP client sockets - TCP/IP server sockets – Datagrams - java.net package Socket- Server Socket- Inet Address- URL- URL Connection  | 12              |  |  |  |  |  |
| II   | Remote Method Invocation: Distributed Application Architecture- Creating stubs and skeletons - Defining Remote objects- Remote Object Activation-Object Serialization-Java Spaces  | 15              |  |  |  |  |  |
| III  | <b>Database</b> : Java in Databases- JDBC principles - database access- Interacting-database search - Creating multimedia databases - Database support in web applications. Hibernate 4.0:Overview of Hibernate, Hibernate Architecture, Hibernate Mapping Types, Hibernate O/R Mapping, Hibernate Annotation, Hibernate Query Language  |                 |  |  |  |  |  |
| IV   | <b>Java Servlets</b> : Java Servlet and CGI programming- A simple java Servlet-Anatomy of a java Servlet-Reading data from a client-Reading http request header-sending data to a client and writing the http response header-working with cookies Java Server Pages: JSP Overview-Installation-JSP tags-Components of JSP page-Expressions – Scriptlets - Directives-Declarations-A complete example. | 16              |  |  |  |  |  |
| V    | Advanced Techniques: JAR file format creation - Internationalization - Swing Programming - Advanced Java techniques. Java Server Faces 2.0-Introduction to JSF, JSF request processing Life cycle, JSF Components.   |                 |  |  |  |  |  |
|      | Total Hours  | 75              |  |  |  |  |  |

| S. No. | List of Programs  |  |  |  |  |  |  |
|--------|---|--|--|--|--|--|--|
| 1.     | Basic Java program using OOPs concept.  |  |  |  |  |  |  |
| 2.     | Display a welcome message using Servlet.  |  |  |  |  |  |  |
| 3.     | Write a program to build a simple Client Server application using RMI.  |  |  |  |  |  |  |
| 4.     | Write a program using JDBC for creating a table, Inserting, deleting records and list out the records.                    |  |  |  |  |  |  |
| 5.     | Prepare an Employee pay slip using JSP.   |  |  |  |  |  |  |
| 6.     | Creating a Database Application using Hibernate.  |  |  |  |  |  |  |
| 7.     | Program using Java Servlet to handle form data.   |  |  |  |  |  |  |
| 8.     | Develop a simple Servlet program to create a table of all the headers it receives along with their associated values.     |  |  |  |  |  |  |
| 9.     | Program in JSP by using session object.   |  |  |  |  |  |  |
| 10.    | Design a Purchase Order form using Html form and JSP.   |  |  |  |  |  |  |
| 11.    | Create a web application that utilizes UI components using Java Server Faces.   |  |  |  |  |  |  |
| 12.    | Create UI widgets and other components including windows, menus and buttons using AWT and Swing.                          |  |  |  |  |  |  |
| 13.    | Program to send a text message to another system and receive the text message from the system (use socket programming).   |  |  |  |  |  |  |
|        | Total Hours 60  |  |  |  |  |  |  |
| Text B | ooks  |  |  |  |  |  |  |

|--------------------|---|-----------|--------------|---------|
| 24MCS23C           | Artificial Intelligence and Machine<br>Learning | Core - VI | 5            | 4       |

The course intends to cover

- Functions of AI, General Search Techniques.
- Concepts of representations, mappings and predicate logic.
- Machine Learning with Data Mining, Big Data and Cloud.
- Applications and impact of Machine Learning.

## **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |  |
|------|--|--------------------|--|
| CLO1 | Demonstrate AI problems and design the techniques.   | K1, K2             |  |
| CLO2 | Understand knowledge designing techniques and use algorithms for ML training.  | K2, K3             |  |
| CLO3 | Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning. | K3, K4             |  |
| CLO4 | Explore the impact of machine learning on applications for real time implementation.   | K4                 |  |
| CLO5 | Analyze real-world problems for implementation and understand the dynamic behaviour of a system.                                       |                    |  |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze   |                    |  |

## **CLO - PLO Mapping**

| CLOs/PLOs              | PLO1 | PLO2            | PLO3           | PLO4      | PLO5     |
|------------------------|------|-----------------|----------------|-----------|----------|
| CLO1                   | 1    | 2               | 3              | 3         | 3        |
| CLO2                   | 1    | 2               | 3              | 3         | 3        |
| CLO3                   | 3    | 2               | 3              | 3         | 3        |
| CLO4                   | 3    | 2               | 3              | 3         | 3        |
| CLO5                   | 3    | 2               | 3              | 3         | 3        |
| 3 - Substantial (high) |      | <b>2</b> - Mode | erate (medium) | 1 - Sligh | nt (low) |

## Core – VI: Artificial Intelligence and Machine Learning

| Unit     | Content   | No. of<br>Hours      |
|----------|---|----------------------|
| I        | Introduction: AI Problems - Al techniques - Criteria for success. Problems, Problem Spaces, Search: State space search - Production Systems - Problem Characteristics - Issues in design of Search.   | 14                   |
| II       | <b>Heuristic Search techniques:</b> Generate and Test - Hill Climbing- Best-First, Problem Reduction, Constraint Satisfaction, Means-end analysis. Knowledge representation issues: Representations and mappings -Approaches to Knowledge representations -Issues in Knowledge representations - Frame Problem.                               | 15                   |
| III      | Using Predicate logic: Representing simple facts in logic - Representing Instance and Isa relationships - Computable functions and predicates - Resolution - Natural deduction. Representing knowledge using rules: Procedural Vs Declarative knowledge- Logic programming –Forward Vs Backward reasoning -Matching-Control knowledge.        | 16                   |
| IV       | Understanding Machine Learning: Introduction to Machine Learning-defining Big Data –Big Data in Context with Machine Learning-The Importance of the Hybrid Cloud-Leveraging the Power of Machine Learning - The Roles of Statistics and Data Mining with Machine Learning-Putting Machine Learning in Context-Approaches to Machine Learning. | 16                   |
| V        | <b>Looking Inside Machine Learning:</b> The Impact of Machine Learning on Applications – Data Preparation-The Machine Learning Cycle.   | 14                   |
|          | Total Hours   | 75                   |

| 24MCS25C    | Data Mining | Core - VII | 4            | 4       |

The course intends to cover

- Various data mining algorithms to solve real-world problems.
- Classification, prediction, clustering and association rule mining of Data mining process.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |  |  |  |
|------|--|--------------------|--|--|--|
| CLO1 | Understand the basic data mining techniques and algorithms   | K1, K2             |  |  |  |
| CLO2 | Interpret the Association rules, Clustering techniques.  | K2, K3             |  |  |  |
| CLO3 | Analyze and evaluate different data mining techniques like classification, prediction, Clustering and association rule mining. | K4, K5             |  |  |  |
| CLO4 | Explore statistical methods and visualization techniques.  | K4                 |  |  |  |
| CLO5 | Apply appropriate data mining algorithms to solve real world problems.   | K3                 |  |  |  |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5-Evaluate  |                    |  |  |  |

#### **CLO – PLO Mapping**

# **Core – VII : Data Mining**

| Unit   | Content   | No. of<br>Hours |  |  |  |
|--|---|-----------------|--|--|--|
| I  | Basic data mining tasks – data mining versus knowledge discovery in databases – data mining issues – data mining metrics – social implications of data mining – data mining from a database perspective. Data mining techniques: Introduction – a statistical perspective on data mining – similarity measures – decision trees – neural networks – genetic algorithms.   | 12              |  |  |  |
| II   | <b>Classification:</b> Introduction –Statistical –based algorithms -distance–based algorithms-decision tree-based algorithms-neural network–based algorithms – rule – based algorithms – combining techniques.  | 12              |  |  |  |
| III  | Clustering: Introduction—Similarity and Distance Measures — Outliers — Hierarchical Algorithms — Partitional Algorithms. Association rules: Introduction - large item sets - basic algorithms — parallel & distributed algorithms — comparing approaches—incremental rules — advanced association rules techniques — measuring the quality of rules.  | 12              |  |  |  |
| IV   | Statistical Descriptions and Data Visualization: Basic Statistical Descriptions of Data - Measuring the Central Tendency: Mean, Median, and Mode - Measuring the Dispersion of Data: Range, Quartiles, Variance, Standard Deviation, and Interquartile Range - Graphic Displays of Basic Statistical Descriptions of Data.  Data visualization: Pixel-Oriented Visualization Techniques - Geometric Projection Visualization Techniques - Icon-Based Visualization Techniques - Hierarchical Visualization Techniques - Visualizing Complex Data and Relations. | 14              |  |  |  |
| V  | <b>Data Mining Trends And Research Frontiers:</b> Mining Complex Data Types, Other Methodologies of Data Mining, Data Mining Applications, Data Mining and Society, Data Mining trends.   | 10              |  |  |  |
|  | Total Hours   | 60              |  |  |  |
| Text F   | Books   |                 |  |  |  |

| 24MCS2AE    | Big Data Analytics | Elective - II | 4            | 4       |

The course intends to cover

- 1. R Programming, Mapreduce and Hadoop based analytics and HDFS architecture.
- 2. Big data collection and analysis.
- 3. Project development under big data.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements   | Knowledge<br>Level |  |
|------|--|--------------------|--|
| CLO1 | Interpret the basic and importance of big data.                          | K1, K2             |  |
| CLO2 | Understand the R language and its application with big data.             | K2                 |  |
| CLO3 | Apply the Hadoop features and HDFS.                                      | К3                 |  |
| CLO4 | Infer the security controls in big data.                                 | К3                 |  |
| CLO5 | CLO5 Analyze HDFS, MapReduce architecture and Machine learning concepts. |                    |  |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Ana                     | lyze               |  |

# **CLO – PLO Mapping**

# **Elective - II : Big Data Analytics**

| Unit   | Content  | No. of<br>Hours |
|--------|--|-----------------|
| I      | Importance of Big Data: Introduction to big data analytics - what is big data? - Challenges in big data - Big data in business perspectives - Big data from technology perspectives - 5 V's of big data - Importance of Big Data: A Flood of Mythic. Industry Examples of Data: Digital Marketing and the Non - line World - Database Marketers, Pioneers of Big Data - Big Data and the New School of Marketing.                                | 12              |
| II     | <b>Data analytics tools for Big Data:</b> An overview of analytics tools: R & Hadoop - Installing R - Installing RStudio - Understanding the features of R language - Using R - packages - Performing data operations - Increasing community support - Performing data modeling in R Hadoop environment - Core component of hadoop - Mapreduce working methodology - Case study: Walmart data processing.  | 10              |
| III    | HDFS and Storage of data: Understanding Hadoop features - Understanding HDFS - Understanding the characteristics of HDFS - Understanding MapReduce - Learning the HDFS and MapReduce architecture. Big Data Storage - Big Data Storage Challenges - Key Insights for Big Data Storage - Data storage methods: Warehouse Storage - Cloud Storage. Data Storage Technologies: Hadoop - HBase. Case Study: Health care data storage and challenges. | 14              |
| IV     | <b>Security Planning in Big data:</b> Big data security - Important to secure big data - The architecture of big data security - Big data security works - Types of data security controls - The major big data security challenges - The big data security best practices. The best security tools for big data storage.  | 12              |
| V      | MapReduce Architecture & ML: Understanding the HDFS architecture - Understanding HDFS components - Understanding the MapReduce architecture - Understanding MapReduce components. Machine Learning: Introduction, Supervised Learning, Unsupervised Learning, Big Data Analytics with R.   | 12              |
|        | Total Hours  | 60              |

|-------------|-----------------|---------------|--------------|---------|
| 24MCS2BE    | Ethical Hacking | Elective - II | 4            | 4       |

The course intends to cover

- Fundamentals of hacking, foot printing and scanning.
- Threats caused by malware, denial of service, sniffers and session hijacking.
- Problems and solutions for web server and database server hacking.
- Attacks of mobile security, wireless technologies, IDS and firewalls.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |
|------|---|--------------------|
| CLO1 | Understand the foundations of Ethical hacking.                                | K1, K2             |
| CLO2 | Defend the concepts of foot printing, windows enumeration and system hacking. | K2                 |
| CLO3 | Explore the various forms of malware threats.                                 | K4                 |
| CLO4 | Analyze on the web server and web application hacking.                        | K4                 |
| CLO5 | Apply the concept of firewalls, honeypots and physical security.              | К3                 |
|      | K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze                      |                    |

#### **CLO - PLO Mapping**

| CLOs/PLOs                       | PLO1 | PLO2         | PLO3       | PLO4      | PLO5     |
|---------------------------------|------|--------------|------------|-----------|----------|
| CLO1                            | 2    | 1            | 3          | 2         | 2        |
| CLO2                            | 3    | 2            | 1          | 3         | 3        |
| CLO3                            | 1    | 3            | 2          | 2         | 3        |
| CLO4                            | 2    | 3            | 3          | 1         | 2        |

# **Elective- II: Ethical Hacking**

| Unit   | Content   | No. of<br>Hours |  |  |  |
|--------|---|-----------------|--|--|--|
| I      | An Introduction to ethical Hacking: Security Fundamental - Security testing - Hacker and Cracker - Descriptions - Test Plans - keeping It legal - Ethical and Legality. The Technical Foundations of Hacking: The Attacker's Process - The Ethical Hacker's Process - Security and the Stack.   | 10              |  |  |  |
| II     | Foot printing and scanning: Information Gathering, Determining the Network Range, Identifying Active Machines, Finding Open Ports and Access Points, OS Fingerprinting Services, Mapping the Network Attack Surface. Enumeration and System Hacking: Windows Enumeration - NetBIOS and LDAP Enumeration - SNMP Enumeration - Nontechnical Password Attacks - Technical Password Attacks - Privilege Escalation and Exploiting Vulnerabilities | 14              |  |  |  |
| III    | Malware Threats: Viruses and Worms - Trojans - Covert Communication - Keystroke Logging and Spyware - Malware Counter measures - Sniffers. Session Hijacking and Denial of Service : Sniffers - Session Hijacking - Denial of Service and Distributed Denial of Service   | 11              |  |  |  |
| IV     | Web Server - Applications and Database Attacks: Web Server Hacking - Web Application Hacking - Database Hacking - Wireless Technologies - Mobile Security and Attacks: Wireless Technologies - Mobile Device Operation and Security - Wireless LANs - Wireless Hacking Tools - Securing Wireless Networks   | 13              |  |  |  |
| V      | <b>IDS - Firewalls and Honeypots</b> : Intrusion Detection Systems - Firewalls - Honeypots - Physical Security and Social Engineering: Physical Security - Social Engineering   | 12              |  |  |  |
|        | Total Hours   | 60              |  |  |  |

| 24MCS2CE           | Neural Networks and Deep<br>Learning | Elective - II | 4            | 4       |

The course intends to cover

- Neural networks in engineering, artificial intelligence and cognitive modelling.
- Supervised learning in neural networks.
- Role of machine learning and deep neural networks.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO  | CLO Statements  | Knowledge<br>Level |
|------|---|--------------------|
| CLO1 | Recite the basics of neural networks.                           | K1                 |
| CLO2 | Understand the various techniques of single layer perceptron.   | K2                 |
| CLO3 | Apply the back propagation techniques.                          | К3                 |
| CLO4 | Interpolate the basics of machine learning.                     | K2                 |
| CLO5 | Infer the newer optimization methods for deep neural networks.  | К3                 |
|      | <b>K1</b> - Remember; <b>K2</b> - Understand; <b>K3</b> - Apply |                    |

#### **CLO - PLO Mapping**

| CLOs/PLOs       | PLO1         | PLO2       | PLO3    | PLO4      | PLO5 |
|-----------------|--------------|------------|---------|-----------|------|

# **Part – IV : Ability Enhancement Compulsory Courses**

(All the Postgraduate Programmes)

| Course Code | Course Name | Category  | Hours / Week | Credits |
|-------------|-------------|-----------|--------------|---------|
| 24SOF2AE    | Soft Skills | AECC - II | 2            | 2       |

#### **Course Objectives**

The course intends to cover

• The essential soft skills that is crucial for success in today's dynamic and interconnected workplace.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

| CLO   | CLO Statements  | Knowledge<br>Level |  |  |  |
|---|---|--------------------|--|--|--|
| CLO1  | Understand the comprehensive skills to participate actively in conversation, writing short texts with expression                                    | K1, K2, K3         |  |  |  |
| CLO2  | Infer the cohesive devices to describe and discuss any objects, pictures using compound, complex sentence forms.                                    |                    |  |  |  |
| CLO3  | Comprehend the logic in the given situation to organize the ideas to write formal and informal letters.   | K2, K3             |  |  |  |
| CLO4  | Understand the given material to organize it in a logical sequence to present a paragraph with main and supporting ideas with concluding sentences. |                    |  |  |  |
| CLO5  | K3  |                    |  |  |  |
| K1 - Remember; K2 - Understand; K3 - Apply; |   |                    |  |  |  |

# **Ability Enhancement Compulsory Course - II: Soft Skills**

| Unit | Details  | No. of<br>Hours |
|------|--|-----------------|
| I    | Presentation Skills: Getting to Know You: Grammar: Introduction to Tenses; Listening: Fill in the blanks; Speaking: Self Introduction, Everyday English, Role-Play; Reading: Different ways of communication. My Day: Grammar: Present simple positive & negative / Adverbs of Frequency; Vocabulary & Speaking: Daily Activities; Listening: Observe and Answer / Telling the time; Reading & Writing: Describe where you live. Your World: Grammar: Possessive determiners; Vocabulary & Speaking: Talk about countries, nationalities; Listening: Positive & negative contractions; Reading & Writing: Personal profile. The World Of Work: Grammar: Yes/No & Wh Questions; Vocabulary & Speaking: Jobs; Listening: Recognize the schwa sound; Reading & Writing: Opening and closing an email. Places And Things: Grammar: There is / there are, articles; Vocabulary & Speaking: Talk about rooms & furniture; Listening: Directions; Reading & Writing: Imperatives.24 Hours: Grammar: Likes & Dislikes; Vocabulary & Speaking: Speak about hobbies and interests; Listening: Observe & answer; Reading: Match the photos with descriptions; Writing: Write complete sentence using prompts; | 6               |
| II   | Confidence: Clothes and Shopping: Grammar: Modal verbs / Adverbs of Frequency / Adjectives and Adverbs; Vocabulary & Speaking: Shopping; Listening: Observe and Answer; Reading & Writing: Product Review. Travel & Transport: Grammar: Past simple questions; Vocabulary & Speaking: Talk about holidays; Listening: At the train station; Reading & Writing: Email - A perfect holiday. Health & Fitness: Grammar: Past simple irregular verbs; Vocabulary & Speaking: Talk about a healthy lifestyle; Listening: Listen & Answer; Reading & Writing: Time sequencers. Music: Grammar: Present perfect simple; Vocabulary & Speaking: Survey about music; Listening: Listen two people talk about music; Reading: Use adjectives and create sentences. Let's go shopping: Grammar: Countable & Uncountable; Vocabulary & Speaking: Town Survey; Listening: Listen and answer; Reading & Writing: Read and match  | 6               |
| III  | Creativity: Cooking & Eating: Grammar: Some & Any, Quantifiers; Vocabulary & Speaking: Food & Drink; Listening: Kitchen conversation; Reading & Writing: Article reading & answering. Survival: Grammar: Comparison of adjectives; Vocabulary & Speaking: Describing people; Listening: Listen & Answer; Reading & Writing: Read and Answer. Working Together: Grammar: Verb + Noun phrases; Vocabulary & Speaking: Talk about technology; Listening: Listen & Answer; Reading & Writing: Notice. Music: Grammar: Present perfect simple; Vocabulary & Speaking: Survey about music; Listening: Listen two people talk about music; Reading: Use adjectives and create sentences. Culture and Arts: Grammar: Present perfect; Vocabulary & Speaking: Speak on the phone; Listening: Listen and answer; Reading & Writing: Review   | 6               |

| Unit | Content   |    |
|------|---|----|
| IV   | Problem-Solving: Do's and Don'ts: Grammar: Modal verbs; Vocabulary & Speaking: Role play; Listening: Holidays in January; Reading & Writing: Article reading & answering. Body: Grammar: First conditional; Vocabulary & Speaking: Personality & Appearance; Listening: Listen to conversations about personality; Reading & Writing: Read and Answer about your skills. Speed: Grammar: Present simple passive; Vocabulary & Speaking: Talk about relationships; Listening: Listen & Answer; Reading & Writing: Error spotting. Work: Grammar: Adverbs of manner; Vocabulary & Speaking: Talk about work advice; Listening: Observe & Answer; Reading: Read & check your ideas | 6  |
| V    | Critical Thinking: Influence: Grammar: would / past habits; Listening: Sentence Correction; Speaking & Vocabulary: Your inspiration; Reading: Picture description; Writing: Rewrite the sentences. Money: Grammar: Second conditional; Listening: radio programme; Speaking & Vocabulary: Talk about games; Reading & Writing: Fill in the blanks. Things that changed the world: Grammar: articles; Speaking & Listening: Talk about chewing gum; Reading & Writing: Read and write a book review  | 6  |
|      | Total Hours   | 30 |
