## **Core Lab - I: Advanced Excel and Financial Modeling**

Unit	Content
Ι	<ul> <li>Introduction to Excel: Interface, Navigation, and Basic Functions – Data Types and Formatting – Formulas and Functions – Relative and Absolute Cell Referencing – Conditional Formatting – Data Validation – Charts and Graphs.</li> <li>Advanced Functions (VLOOKUP, HLOOKUP, INDEX, MATCH) – Data Manipulation (Sort, Filter, Subtotal, Pivot Tables) – Data Analysis (Goal Seek, Scenario Manager, Data Tables) – Excel Shortcuts and Productivity Tips</li> </ul>
Ш	<ul> <li>Advanced Excel: Array Formulas – Named Ranges and Dynamic Named Ranges – Excel Tables</li> <li>– Recording and Running Macros – Introduction to Excel VBA – User Forms and Controls – Excel Add-ins and Customization.</li> <li>Generative AI Tools in Excel: Introduction to Generative AI – AI-powered Data Analysis and Insights – Automating Tasks with AI-driven Macros – Best Practices and Limitations of AI in Excel Power Query in Excel.</li> </ul>
III	<b>Introduction to Finance</b> : Basic Financial Concepts and Terminology – Understanding Financial Statements (Balance Sheet, Income Statement, Cash Flow Statement) – Ratios and Financial Analysis – Time Value of Money Concepts.
IV	<b>Excel for Financial Analysis</b> : Financial Functions (PV, FV, NPV, IRR) – Loan and Investment Calculations – Depreciation Schedules – Sensitivity Analysis (Goal Seek, Data Tables)
V	<b>Basic Financial Modeling</b> : Purpose and Structure of Financial Models – Building a Basic Financial Model in Excel – Assumptions and Inputs – Forecasting Techniques – Scenario Analysis and Sensitivity Testing.
Text B	ooks
1.	Paul McFedries, Greg Harvey, (2021), Excel 2021 All-in-One For Dummies, Wiley Publishers.
2.	Alexander, M., Walkenbach, J., Kusleika, D., & Cox, C. (2018). Microsoft Excel 2019 Bible. Wiley.
Referen	nce Books

	esources (Swayam/NPTEL)
Web R	esources (Swayam/Nr IEL)

S.No.	Programs
1.	<b>Interface Navigation and Basic Functions</b> <b>Exercise:</b> Explore Excel's interface, navigate through menus and ribbons, and understand basic navigation. Create a worksheet, apply various formatting techniques (font styles, sizes, cell colors), and use basic functions like SUM and AVERAGE.
2.	<b>Formulas and Functions</b> <b>Exercise:</b> Calculate total sales for a week using SUM, average daily sales using AVERAGE, and highest sales using MAX. Use formulas to calculate simple arithmetic operations. Include more complex functions like IF, COUNTIF, and nested functions.
3.	<b>Relative and Absolute Cell Referencing</b> <b>Exercise:</b> Create a budget spreadsheet: use relative and absolute references to calculate total costs by applying discounts/taxes to different items. Include exercises on using named ranges and dynamic references in complex formulas.
4.	<b>Conditional Formatting and Data Validation</b> <b>Exercise:</b> Highlight cells in a sales report that meet certain criteria (e.g., sales > \$1000). Use color scales and data bars to visually represent data trends. Set up data validation rules for a data entry form: restrict entries to certain dates, create drop-down lists, and validate numeric ranges.
5.	Charts and Graphs Creation Exercise: Create a sales performance chart: use different types of charts (bar, line, pie) to represent data visually. Customize chart elements like titles, legends, and data labels. Create advanced chart types like combo charts and use sparklines for data visualization.
6.	Advanced Functions: VLOOKUP, HLOOKUP, INDEX Exercise: Use VLOOKUP to find prices of products in a list and HLOOKUP to retrieve student grades from a table based on different criteria. Practice using INDEX and MATCH functions to create a more dynamic and flexible lookup solution for a dataset.
7.	<b>Data Manipulation: Sorting, Filtering, Pivot</b> <b>Exercise:</b> Sort and filter a list of employees based on department and salary. Use subtotals to summarize data. Create pivot tables for detailed analysis. Include exercises on grouping data, creating calculated fields/items, and using slicers for interactive analysis.
8.	<ul> <li>Power Query Data Transformation</li> <li>Exercise: Open Excel and navigate to the Power Query editor. Familiarize with the Power Query interface: ribbon, query pane, and data preview area.</li> <li>Importing Data: Import data from various sources such as an Excel file, CSV file, and a web page. Combine multiple data sources into a single query.</li> <li>Data Cleaning and Transformation: Remove unnecessary columns and rows. Filter data based on specific criteria (e.g., date ranges, text values). Split columns by delimiter and merge columns.</li> <li>Data Aggregation: Group data by specific columns and perform aggregation functions like sum, average, count, etc. Unpivot data to transform it into a more suitable format for analysis.</li> <li>Data Merging and Appending: Merge queries to combine related data from different sources. Append queries to stack data from multiple tables or files.</li> </ul>

S.No.	Programs	
9.	<b>Excel Macros and VBA Basics</b> <b>Exercise:</b> Record and run macros to automate repetitive tasks. Introduction to VBA: VBA scripts to enhance Excel functionality. Include exercises on using VBA to a cleaning, report generation, and interactive user forms.	1
10.	<b>Financial Analysis and Functions</b> <b>Exercise:</b> Use financial functions (PV, FV, NPV, IRR) to perform loan and investment Create depreciation schedules and perform sensitivity analysis using Goal Seek and Include exercises on creating financial models and using Excel for financial forecasting.	
11.	<b>Basic Financial Modeling</b> <b>Exercise:</b> Build a basic financial model in Excel: define assumptions, inputs, and outp scenario analysis and sensitivity testing. Include exercises on creating dynamic model inputs and automated summary reports.

24BCF16A	<b>Computer Applications in Business</b>	Allied - I	4	3

This course intends to Cover

- Introduction of computer and its various parts.
- Concepts of data base management system and Management information system.
- Insight about networking and basics of internet.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

CLO	CLO Statements	Knowledge Level		
CLO1	Recall the various concepts relating to computer and its various parts	K1		
CLO2	Understand the meaning of software, operating system, programming language and its features	K2		
CLO3	Comparing Data Vs Information and its management system	K2		
CLO4	Understanding about various concepts of management information system	K3		
CLO5	Generating more ideas regarding the use of internet for business purpose	K2		
K1- Remember; K2- Understand; K3- Apply

Course Code	Course Name	Category	Hours / Week	Credits
24ENV1FC	<b>Environmental Studies</b>	FC- I	2	2

Unit	Content									
Ι	The Multidisciplinary nature of environmental studies Definition; Scope and importance, Need for public awareness.									
Π	<ul> <li>Natural Resources:</li> <li>Renewable and non-renewable resources:</li> <li>Natural resources and associated problems.</li> <li>Forest resources: Use and Over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forests and tribal people.</li> <li>Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams benefits and problems.</li> <li>Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.</li> <li>Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies.</li> <li>Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources, Case studies.</li> <li>Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification.</li> <li>Role of an individual in conservation of natural resources. Equitable use of resources for</li> </ul>									
III	sustainable lifestyles.         Ecosystems         - Concept of an ecosystem.         - Structure and function of an ecosystem.         - Producers, consumers and decomposers.         - Energy flow in the ecosystem.         - Ecological succession.         - Food chains, food webs and ecological pyramids.         - Introduction, types, characteristic features, structure and function of the following ecosystem: -         a. Forest ecosystem         b. Grassland ecosystem         c. Desert ecosystem         d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries).									

Unit	Content								
	Biodiversity and its Conservation								
	- Introduction-Definition: genetic, species and ecosystem diversity.								
	- Bio geographical classification of India.								
	- Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and								
IV	option values.								
1 V	- Biodiversity at global, National and local levels.								
	<ul><li>India as a mega-diversity nation.</li><li>Hot-spots of biodiversity.</li></ul>								
	<ul> <li>Threats to biodiversity: habital loss, poaching of wildlife, man-wildlife conflicts.</li> </ul>								
	<ul> <li>Endangered and endemic species of India.</li> </ul>								
	<ul> <li>Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.</li> </ul>								
	Environmental Pollution Definition								
	- Causes, effects and control measures of: -								
	a. Air pollution								
	b. Water pollution								
	c. Soil pollution								
	d. Marine pollution								
v	e. Noise pollution								
	f. Thermal pollution								
	g. Nuclear hazards								
	- Solid waste Management: Causes, effects and control measures of urban and industrial								
	wastes.								
	<ul> <li>Role of an individual in prevention of pollution.</li> <li>Pollution case studies.</li> </ul>								
	<ul> <li>Pointion case studies.</li> <li>Disaster management: floods, earthquake, cyclone and landslides.</li> </ul>								
	Social Issues and the Environment								
	- From Unsustainable to Sustainable development.								
	- Urban problems related to energy.								
	<ul> <li>Water conservation, rain water harvesting, watershed management.</li> </ul>								
	<ul> <li>Resettlement and rehabilitation of people; its problems and concerns. Case studies.</li> </ul>								
	- Environmental ethics: Issues and possible solutions.								
	- Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and								
	holocaust. Case studies.								
VI	- Wasteland reclamation.								
	- Consumerism and waste products.								
	- Environment Protection Act.								
	- Air (Prevention and Control of Pollution) Act.								
	- Water (Prevention and Control of Pollution) Act.								
	- Wildlife Protection Act Forest Conservation Act.								
	- Issues involved in enforcement of environmental legislation.								
	- Public awareness.								

Unit	Content									
	Human Population and the Environment									
	- Population growth, variation among nations.									
	- Population explosion-Family welfare Programme.									
	- Environment and human health.									
VII	- Human Rights.									
V 11	- Value Education.									
	- HIV/AIDS.									
	- Women and Child Welfare.									
	- Role of information Technology in Environment and human health.									
	- Case Studies.									
	Field Work (Practical).									
	- Visit to a local area to document environmental assets-river/forest/grassland/ hill/mountain.									
VIII	- Visit to a local polluted site-Urban/Rural/Industrial/Agricultural.									
	- Study of common plants, insects, birds.									
	- Study of simple ecosystems-pond, river, hill slopes, etc.									
	Total Hours. 30

# Part – IV : Ability Enhancement Compulsory Courses (All the Undergraduate Programmes)

Course Code	Course Name	Category	Hours	Credits
24QUA1AE	Quantitative Aptitude	AECC - I	2	2

#### **Course Objectives**

The course intends to cover

- Basic concepts of numbers, time and work, interests, data representation and graphs
- Concepts of permutation, probability, discounts, percentage & profit loss.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

CLO	CLO Statements	Knowledge Level
CLO1	CLO1 Remember and Understand the concepts of numbers and average	
CLO2	Understand about percentage and apply profit & loss related processing.	K2, K3
CLO3	To understand the concepts of time and work and interest calculations.	K2
CLO4	To understand about the concepts of permutation, combination and probability.	K2
CLO5 Understand, Apply and analyze the concept of problem solving involved in graphs and age.		K2,,K3,K4
	<b>K1</b> - Remember; <b>K2</b> - Understand; <b>K3</b> - Apply; <b>K4</b> - Analyze	

# Ability Enhancement Compulsory Course - I: Quantitative Aptitude

Unit	Content	No. of Hours		
Ι	Numbers - Simplification - BODMAS rule - Algebraic formulas - Decimal fractions - Square root and cube roots - Surds and indices - Divisibility rules - HCF and LCM - same remainder - different remainder - application problems – average – equation - mistaken value – replacement - including/excluding.	6		
Π	II Percentage - increase/decrease - netchange - salary - election - marks - consumption - population / machine - profit and loss - profit and loss % - finding cp and sp - profit=loss - same product cp and sp with percentage - discount - ratio and proportion - divided into parts - based on numbers - increase/decrease/ income / expenditure - coins - partnership.			
III	Time-and-work - individual/combined - alternative days - remaining work - efficiency based - amount split - chain rule - group of male and female or boys - pipes and cistern - finding time - efficiency based – alternative - remaining part - capacity of the tank - simple interest - finding principal - rate of interest – amount -time period - doubles or triples - compound interest - finding rate - finding time, principal - doubles or triples - difference between SI and CI.	6		
IV	Permutation - finding value - vowels come together - vowel never comes together - some letters come together - no two vowels come together - vowels in odd/even places - based on repetition - circular permutation – application – combination - finding value and application – probability – coins - dice-cards - balls and miscellaneous problems - odd man out and number series.	6		
V	Clock - finding angle - reflex angle - gain or loss – calendars - finding particularday - data interpretation - bar chart - line chart - pie chart – table – combined –ages ratio- twice or thrice - addition /subtraction - family based - problems on numbers - equations.	6

# Part - II: English - II

2024 Batch

Course Code	Course Name	Category	Hours/ Week	Credits
24BCF23C	Financial Accounting – II	Core-III	6	4

#### **Course Objectives**

This course intends to cover

- Various methods of accounting, such as Hire purchase and Installments System.
- Branch accounts and allocation of expenses under departmental accounts.
- Partnership accounts relating to admission, retirement, and death.
- Knowledge regarding partnership accounts relating to the dissolution of the firm.
- Requirements of International Accounting Standards for financial reporting.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

CLO	CLO Statements	Knowledge Level	
CLO1	Find out the accounting treatment in Hire purchase accounts	K1	
	and Instalment systems.	KI.	
CLO2	Apply the knowledge in preparing Branch and Departmental	K3	
	Accounts.		
CLO3	Understand the accounting treatment for admission and	K2	
	retirement in partnership

24BCF24C	Fintech and Digital Finance Innovations	Core - IV	4	3

#### **Course Objectives**

This course intends to cover

- The historical development, current trends, and future prospects of the fintech industry, including the key drivers and enablers of fintech innovation.
- Various digital payment methods and block chain technology, including their applications, benefits, challenges, and the impact on traditional financial systems.
- The applications of artificial intelligence and machine learning in finance, such as fraud detection, credit scoring, robo-advisory, algorithmic trading and to discuss the associated ethical considerations and challenges.
- Insurtech landscape and the latest innovations in insurance distribution, underwriting, claims management, and peer-to-peer insurance, emphasizing the role of technology in transforming the insurance industry.

#### **Course Learning Outcomes**

On the successful completion of the course, students will be able to

CLO	CLO Statements			
CLO1	Understand the evolution, landscape, and key drivers of fintech and digital finance innovations.	K2		
CLO2	Analyze the functionality and applications of digital payment systems, including mobile payments, contactless payments, and crypto currency transactions.	K4		
CLO3	Demonstrate knowledge of block chain technology and its financial applications, including smart contracts and distributed ledger technology.	K3		
CLO4	Apply artificial intelligence (AI) and machine learning (ML) techniques in various financial services contexts, such as fraud detection, credit scoring, and robo-advisory			
CLO5	Evaluate the innovations and impact of insurtech on insurance distribution, underwriting, and claims management.	K4		

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze
