xx	Teaching Learning Process	<p>The institution implements a well-structured and documented process to ensure effective curriculum delivery. This begins with the Internal Quality Assurance Cell (IQAC) preparing the academic calendar, which serves as the foundation for planning. Faculty members then create detailed macro and micro plans for their subjects based on the calendar, documenting them in the logbook. These plans, designed to align with institutional objectives are carefully documented in LMS (eCampus) ensuring consistency and accountability. The Heads of Departments (HoDs) conduct weekly reviews to compare planned topics with those covered, while the Dean and Principal oversee this verification process every alternate week. To enhance organization transparency class planners and faculty planners are made accessible through the eCampus platform. Regular class committee meetings, led by HoDs and Dean, assess the curriculum delivery process, with feedback from these meetings playing a critical role in driving continuous improvement. Based on this feedback, the HoDs develop and implement action plans to address any identified issues. Additionally, unit-wise feedback is systematically gathered and analysed after completing each unit, allowing for timely refinements to teaching</p>

		methods, course content, or assessment strategies. This comprehensive approach establishes a robust framework for curriculum management, ensuring effectiveness, adaptability and quality assurance throughout the institution
